SLEEK-'N'-STYLISH MP3 PLAYERS

MOSER BAER'S MP565-2G AND MP582-2G CAN PLAY MP3 AND WMA FILES

Price: Rs 1190 to Rs 1490

Moser Baer has launched compact MP3 players at economical prices. Two models are available: MP565-2G and MP582-2G.

The MP565-2G has a high-contrast LCD with 7-colour backlight, integrated flash memory and FM radio, hold

feature to prevent accidental key presses and USB 2.0 Hi Speed for fast file transfers. It can play MP3 and WMA digital music files.

The MP582-2G lets you clip your music anywhere. It can play 33 hours of MP3 and 66 hours of WMA files. It's also capable of mobile data storage and USB 2.0 for fast file transfers.

Both the MP3 models come with 2GB memory and a set of professional stereo earphones and USB adaptor.

NOISE-CANCELLING HEADPHONES

HEAR YOUR MUSIC, NOT THE NOISE, WITH THESE FOLDABLE, NOISE-CANCELLING HEADPHONES FROM SONY

Price: Rs 4490

Enhance your listening experience and reduce unwanted ambient noise by 90 per cent with Sony's MDR-NC7 headphones. The headphones are perfect for travel with a convenient, foldable, swivel design and a battery life of approximately 50 hours. Also, there's a dual-use capability that gives you the option to listen to your music with or without the noise cancellation feature. The 30mm driver (neodymium magnet) and a convenient on/off switch for noise-cancelling will allow you to use the headphones even if the battery runs dry.

HIGH-SPEED DIGITAL CAMERA

CASIO'S EX-FH20 TAKES 40 SHOTS PER SECOND AND RECORDS HIGH-SPEED MOVIES AT 1000 FPS

Price: Rs 44,995

Casio India has released a new camera in its EXILIM range, the high-speed EX-FH20. While performing at speeds

unmatched by the world's top digital SLRs, the EX-FH20 is designed to appeal to a broader range of users. In addition to simplifying controls by placing all shooting mode settings on a single dial, it has a 20x optical zoom on a surprisingly compact body.

The EX-FH20 is capable of ultra-high-speed burst shooting at 40 fps and can record high-speed movies at up to 1000 fps. Its high-speed anti-shake function corrects images by automatically synthesising multiple images captured during high-speed burst shooting.
