TOP 4 SOFTWARE

EDWinXP 1.70

Eagle 5

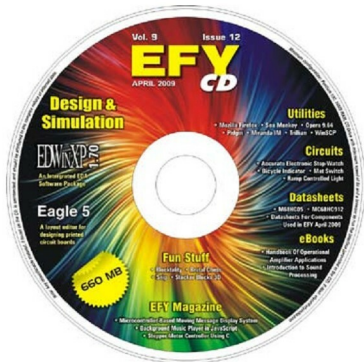

Mozilla Firefox 3.0.7

Sea Monkey

Pidgin

EDWinXP 1.70. Using this 30-day trial software package, you can create electronic circuits and design and fabricate PCBs. EDWinXP stands for 'electronics design for Windows.' It supports schematic capture, digital/analogue simulator, filter design, PCB layout design, board analysis, 8051 and VHDL simulator. The minimal requirement for this software is a Pentium II based computer with 64 MB of RAM, SVGA colour monitor, screen resolution of 800x600 and any Windows operating system.

EAGLE 5. EAGLE (easily applicable graphical layout editor) is a powerful tool for designing PCBs. It combines a layout editor, a schematic editor and an auto-router in one single package. EAGLE is suitable for Windows 2000, XP and Vista. The auto-router gives you the option to design double-sided PCBs. The software included in the CD is an evaluation version.

Mozilla Firefox 3.0.7. Mozilla Firefox 3.0.7 is a free Web browser that features tabbed browsing, spell checker, incremental find, live bookmarking, download manager and a search system that uses the user's de-

sired search engine.

Sea Monkey. Sea Monkey is yet another Web browser which is similar to Netscape and Mozilla. It is an all-in-one application suite which has a browser, e-mail client, HTML editor, IRC chat and Web development tools.

Miranda IM. Miranda IM is a multi-protocol instant messaging (IM) client for Windows. It is very light on system resources but extremely fast. Featuring a powerful plugin-based framework and boasting over 350 plugins, Miranda IM is one of the most flexible and customisable messaging clients.

Pidgin. The Pidgin multi-protocol IM client allows you to use all of your IM accounts at once. It supports multiple operating systems, including Windows as well as many Unix-like systems such as Linux, BSD and Mac OS X. Pidgin features some of the standard tools for an IM client, such as a contacts list, file transfer on supported protocols, and conversation and chat logging. The IM window consists of the message window, formatting tools and an edit box.
