Sony Ericsson's PlayNow service

Sony Ericsson's latest one-click content service—PlayNow—is now available in India and the content can be downloaded at a price between Rs 9 and Rs 99. PlayNow provides unlimited access to a wide range of music tracks (MP3 tones, polytones, truetones), themes and animations from major record companies around the world. It is also packed with game titles like *Need for Speed*, *Harry Potter*, *FIFA*, *SIMS*; a gamut of foot-tapping music numbers; and vibrant wallpapers from Bollywood and Hollywood. Compatible with GPRS services, PlayNow also offers a seamless billing integration, saving the hassle of payments through credit cards.

Toshiba Satellite M500 Notebook

Toshiba India has launched the Premier Series Satellite M500 notebook, which features a 35.6cm LED backlight display with clear supervision technology and widescreen 16:9 aspect ratio that offers a resolution of 1366x768 pixels and a luminance of 260 NITS. The Harman/Kardon stereo speakers provide a vibrant sound experience. The Satellite M500 has an integrated DVD super multi-drive (dual-layer), a 5-in-1 card reader, three USB 2.0 interfaces and an additional eSATA/USB combo port that supports sleep-and-charge, allowing a customer to charge an MP3 player, mobile phone or other device while the laptop is switched off. The notebook is priced at Rs 53,490.

Apple to use solar cell?

Apple has apparently filed a patent application to investigate the use of solar cells in its mobile devices, including iPhone and portable computers. The technology behind this is quite interesting. It goes back to a 2001 patent that Motorola filed, exploring the use of photovoltaic cells behind the LED screen of the device, much like a calculator. If Apple pulls this off successfully, there would be no design modifications at all. iPods and MacBooks would then run without any mains charge.

Nokia's personalised home screen

Nokia has unveiled the N97—the most advanced converged touch device from Nseries in India. The Nokia N97 pioneers the concept of a personalised home screen that lets people choose their favourite content, providing an 'always open' window to applications and/or Internet content such as social networking sites, RSS feeds and other widgets in addition to Ovi feeds.

VALUE-FOR-MONEY NETBOOK

INTEX NETBOOK IS POWER-EFFICIENT, WITH BATTERY LIFE OF 240 MINUTES

LAN module and also features Bluetooth connectivity, 7-in-1 mini card reader, WSVGA LED backlight display and a battery life of 240 minutes.

Price:
Rs 18,900 (black)
Rs 19,400 (red)

STYLISH LCD MONITORS

THE SAMSUNG LAVENDER SERIES IS ELEGANTLY DESIGNED IN ROSE BLACK COLOUR

Samsung India has launched Lavender Series of LCD monitors with new and stylish features.

Features & USP. The Lavender series monitors are available in 55cm

and 58cm screen sizes with dynamic contrast ratio of 50000:1, response time of 2 ms, viewing angle of 170/160 degrees and a 16:9 wide-format panel that is made for multimedia and optimised for HD content. These boast of an elegant touch-of-colour design in rose black colour with a distinctive fine cut on the rear.

The monitors have front OSD touch buttons that emit red light from under the panel. Use of biodegradable components in manufacturing of exterior panels makes these 100 per cent recyclable and environment-friendly. The monitors consume less than 1W of power in the power-off mode, which makes these more energy-efficient than conventional monitors.

Price:
Rs 12,500 (55 cm)
Rs 13,500 (58 cm)
