

Fujifilm FinePix S8000 digital camera

Quality of video shot by digicams

Kenichi Tanaka, managing director of Fujifilm Corp. India, informs that digital cameras now offer video quality of 640×480 for normal and 1280×720 for high definition at 30 frames per second (fps), which is good for general purpose.

The best-quality videos shot using a digital still camera are good enough for home viewing under most conditions. There are also various other formats to suit different needs, like shooting videos for the Internet.

Some digital SLR cameras also offer digital video shooting nowadays. Since these cameras use much larger sensors, image quality is very good, although the shooting process suffers from a few drawbacks at present.

Quality of stills captured by camcorders

The technology used in a digital camcorder is optimised for processing video images. The sensors used for capturing still images, though nowadays offering

high resolutions (12 megapixels in some models), are often too small to give the same quality as dedicated digital still cameras. However, like the movies shot by the still cameras, the stills captured by digital camcorders are not of very high quality and are therefore useful for everyday purposes only.

To sum up...

As is clear from the above discussion, digital cameras and camcorders are meant for different types of photography and therefore the technology as well as the R&D for the same always have different aims.

Of course, in the future, you might have better video quality from digital still cameras and better still picture quality from digital camcorders, but there would always remain the gap as far as optimal performance is concerned.

So choose between the two depending on what is more important to you, shooting good-quality video or good-quality stills? ●

BOOKS

NEW RELEASE

Training in Experimental Physics Through Demonstrations and Problems

Authors: Rajesh B. Khaparde, H. C. Pradhan
Price: Rs. 375/-

Fundamentals of Microcontrollers and Applications in Embedded Systems

Ramesh Gaonkar
Price: Rs. 300/-

Illustrated Programming with C++

Dilip Mali
Pramod Vasambekar
Price: Rs. 210/-

Programmable Logic Controllers & Industrial Automation An Introduction

Madhuchhanda Mitra
Samrajit Sen Gupta
Price: Rs. 200/-

Elements of Artificial Neural Networks

Second Edition
Kishan Mehrotra,
Chilukuri Mohan,
Sanjay Ranka
Price: Rs. 320/-

To avail special offer on books visit: www.penram.com

Lightwave Communication Systems

Rajappa Papannareddy
Price: Rs. 210/-

Power Electronics and Its Applications

Second Edition
Alok Jain
Price: Rs. 240/-

USB Complete

Third Edition
Jan Axelsson
Price: Rs. 380/-

Serial Port Complete

Jan Axelsson
Price: Rs. 330/-
