Training Institutes

Regarding an article by EFY journalist Ms Sudeshna Das, I would like to bring to her notice the advanced M.Tech and PG diploma training programmes being offered by DOEACC Centre, Calicut, in embedded systems, VLSI design, industrial automation system design, software technologies, etc (visit www.doeaccalicut.ac.in or www.cedtic.com). IIIT Bangalore is also an excellent institute for M.Tech.

Dr G.M Ajit

DOEACC Centre, Calicut

Project Material

I am pursuing BE in electronics and instrumentation engineering and wish to assemble an electronics project. Can I get the project material from your website 'www.electronicsonline.com/electronicsonline/default.asp'?

Esakki Raj

Bulletin Board

www.electronicsonline.com

EFY: You will see various sections like home, circuit lab and technical articles listed on the left-hand side of the mentioned web page. Click either 'circuit lab' or 'circuits on sale' to get the information about the projects published in EFY. You can also visit the website of EFY associates Kits'n'Spares (www.kitsnspares.com) to get the PCBs and components for the projects.

☐ I want to purchase some electronics projects. Please send me EFY's latest project list along with the cost of the projects.

Parasanna D.

Through e-mail

EFY: Please visit 'www.kitsnspares.com' to search projects of your choice. To purchase any of the projects mentioned on the website, dial Kits'n'Spares at 011-26371661.

Tutorial on Circuit Design

I am a computer engineering student and want to know more about electronics so that I can make my own projects. EFY does quench my thirst of knowledge but I want to learn the design of these circuits. Please suggest me some good books or websites to help me learn.

Anvesh

Through e-mail

EFY: Electronics is a vast subject, so please let us know the exact topics you are interested in. This will help us to suggest you appropriate sources. Meanwhile, you may visit 'www.electronicsonline.com' and check out 'technical articles' section.

Piezoelectric Transducer

As part of her school project, my daughter needs to demonstrate the working of a piezoelectric transducer. Please tell us whether we can use the vibrations produced in a mobile phone for this demonstration.

Farooq Ahmad

Kashmir

EFY: Refer to the 'Knock Alarm' circuit published in *Electronics Projects* Vol. 23. This project is based on a piezoelectric sensor. When someone knocks on the door, the piezoelectric sensor detects the mechanical vibration and generates an electrical signal, which is then amplified by active devices such as transistors. The amplified output activates a timer to sound the alarm for about 10 seconds through the speaker. This circuit can even sense a mild vibration in a mobile phone and sound the alarm.

PCB Design Software

Please suggest me some simple design software for single-sided PCBs.

N.R. Choudhury

Silchar Polytechnic

EFY: We include PCB design software in the EFY-CD almost every month. Cadstar, Eagle, Express PCB, PCB123, DIPTrace, Vutrax and Target3001 are some of the software included so far in EFY-CDs. You can also refer to Kicad—a full-version open source software—in the EFY-CD of Sept. 2008 issue. Contact Kits'n'Spares to purchase the CD.

Hi-Fi Amplifier

Please publish in EFY the circuit of a hi-fi amplifier circuit.

Tapan Roy

Through e-mail

EFY: Refer to '70/40 Watts Hi-Fi Amplifier' circuit published in *Electronics Projects* Vol. 13. Contact Kits'n'Spares to purchase the book.
