E-paper's green credentials will boost adoption

The use of electronic paper, also known as 'e-paper,' is increasing as a result of its ultra-low power consumption, a similar user experience to real paper and 'green' benefits, according to a report from market research firm Gartner. E-paper is a display medium intended to mimic the appearance of ordinary ink on paper while being rewritable.

Gartner said that despite disadvantages of poor colour and refresh rate characteristics, e-paper will have significant benefits over other display media and positively impact the traditional paper market, the retail display sector, a number of consumer markets and the office environment in years to come.

One of the key drivers for e-paper adoption is the way it is continu-

Bagchi becomes MindTree's vice chairman

Roshni takes over as CEO of HCL Corp.

Roshni Nadar, daughter of HCL founder Shiv Nadar, has been appointed as the executive director and CEO of HCL Corporation—the holding company of HCL Technologies and HCL

Infosystems. Shiv Nadar, who remains chairman of the company, has clarified that Roshni's role will be confined to just HCL Corporation and she will not be responsible for any of the operational companies in which HCL has a stake.

Before taking over, Roshni was involved with HCL Corporation as executive director and CEO.

Ahuja to head Agilent India

Parmeet Ahuja has been appointed as the new president and country general manager of Agilent India. Prior to this promotion, Ahuja was the controller of Agilent's Global Infrastructure Organization (GIO) at the corporate headquarters in Santa Clara. In his new role, he succeeds Venkatesh Valluri, who has moved to Ingersoll Rand, a \$13-billion industrial technology company, as the president of its Indian operations.

Tablet-size flexible electronic paper display from LG.Philips LCD and E Ink

ously evolving to include new technologies. Recent additions include touchscreen, wireless connection and rewritable colour support capability into devices using e-paper. Multiple e-book readers have also been introduced and applications of the technology are now expanding beyond e-book readers to include device displays for phones, clocks and watches.

Gartner believes that the cost of e-paper displays will need

to fall further if it is to act as a viable mainstream alternative to print media, especially as the falling costs and increasing quality of alternative technologies—such as OLED and LCD—could moderate the growth potential of e-paper.

Mobile Internet usage exploding

Mobile Internet usage is growing at a phenomenal rate. Social networking is driving that growth with a third of young adults regularly accessing Facebook and Twitter from their mobiles. A report by industry analyst CCS Insight, based on a UK survey of more than 1000 adults between 16 and 35 years, offers insights into the mobile Internet habits of this technology-savvy and demanding consumer group.

According to the report, men are twice as likely as women to access the Internet through their mobile phone; young adults expect mobile content,
