

The World's Lowest Sleep Current MCUs: PIC® MCUs with nanoWatt XLP™ Technology

Microcontrollers

Digital Signal
Controllers

Analog

Serial
EEPROMs

nanoWatt XLP™ Technology offers the industry's lowest currents for Sleep, where extreme low power applications spend up to 99% of their time.

- **Extend Battery Life**
 - Sleep current down to 20 nA
 - Brown-out Reset down to 45 nA
 - Watchdog Timer down to 400 nA
 - Real time clock down to 500 nA
- **Extreme Flexibility**
 - 5 different low power modes to improve power & performance in your application
 - Many low-power supervisors, alarms, and wake-up sources
- **Expanded Peripheral Set**
 - Integrated USB, LCD, RTCC & touch sensing
 - Eliminates costly external components

Need eXtreme Low Power Analog too?
www.microchip.com/analog

GET THE MOST FROM YOUR BATTERY IN YOUR NEXT DESIGN!

- Visit www.microchip.com/XLP
- View the Low Power Comparison demo
- View free Webinars and Application Notes
- Download the Low Power Tips 'n Tricks
- Order samples and development tools

Forget Ultra Low Power... go eXtreme!
