

The image shows the OKI MFR-1100 Series Single Output Soldering and Rework System. It consists of a black power unit with a silver front panel featuring the OKI logo. To the left is a black soldering station with a yellow sponge for cleaning the tip. Several different soldering irons with various tips are shown to the right. The background is white with a yellow swoosh at the bottom.

your production
possibilities?*

The sky's the limit with OK International's MFR-1100 Series

It's true. The MFR-1100 Series Single Output Soldering and Rework System from OK International is equipped with a wide range of tools designed not only to maximize your application solutions, but also to minimize your training investment and boost your productivity.

TAP into OK International

Minimize your Training investment...

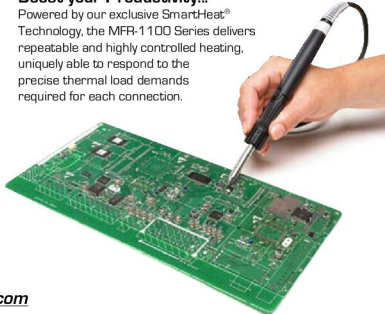

Inherently simple to set-up and use, the intuitive system features advanced ergonomics enabling even inexperienced operators to get to grips with production requirements quickly and easily.

Maximize your Application solutions...

The MFR-1100 Series is the only single output system to utilize both a soldering cartridge and tip for maximum operational flexibility. A high power solution for lead-free, the MFR-1100 Series is ideal for the challenges of production soldering, multi-layer and other thermally demanding applications.

Boost your Productivity...

Powered by our exclusive SmartHeat® Technology, the MFR-1100 Series delivers repeatable and highly controlled heating, uniquely able to respond to the precise thermal load demands required for each connection.
