Innovative Solutions

Next Generation Sensors for Pressure, Relative Humidity and Temperature

ChipCap

- Fully Calibrated Humidity and Temperature Sensor
- Offers both digital and analog configurations on a single 5VDC-powered chip
- Contains the entire signal conditioning circuitry on a single silicon die
- Helps avoid instrument calibration

Pressure Sensors: NPC, NPH, NPI Series

- Based on NovaSensor's Advanced SenStable® piezoresistive sensing (MEMS) technology
- High reliability & Sensitivity
- Calibrated as per the Association for the Advancement of Medical Instrumentation (AAMI) guidelines for industry acceptability
- Customized configurations available based on volume
