

Ito Corporation

is a 62-year-old company dedicated to providing top quality materials, components, and equipment for high density board and flat panel display assembly. 2009 marks our formal entry into the Indian market, and the

staff at Ito Precision Technologies, our Chennai-based subsidiary, look forward to bringing you the same commitment to quality and service that has been our hallmark for over sixty years serving Japan, Asia, the Americas, and Europe. Namaste!

Come Meet Us at electronicaIndia!

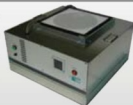

Tabletop through high volume production lines for LCD modules, such as ACF (anisotropic conductive film) assembly and polarizer lamination equipment. www.autoacf.com

Solder pallets and SMT pallets designed to increase capacity, improve reliability, and decrease overall cost. We are the largest supplier of pallets in Japan, and our manufacturing facilities in Thailand bring that technology to you at local prices.

Custom and off-the-shelf clean booths designed specifically for electronic assembly requirements in India. Pay only for the clean level you need, not more.

Precision dispensers for the electronics and industrial assembly industries. From conformal coatings to semiconductor packaging applications, we offer a full range of manual, semi-automatic, and fully-automated systems.
