

contact details, etc is utmost important.

To ensure this, we introduced the latest biometric system into the system. The cost of the whole system was very high but it really helped us in streamlining the process completely. Now, nobody can be hand in glove with the administrative officer. We know the exact time of entry of the staff, their leave details, etc.

We have become so much dependent on IT that we have even streamlined our recruitment process on the strength of IT. With a click we can divulge details of who interviewed who and on what date, what comments were made, when one joined, what appraisal one got and all other relevant information.

The one-time problem of data that we faced in the year 2005 actually changed our attitude towards administration of the university. It is IT that has made the whole data available at the click of a button. Of course, the IT
