

CoreEI Technologies: Nurturing the dreams for a bright future

CoreEI technologies is one of India's oldest and most preferred electronic design and distribution company. We have more than a decade of experience in the areas of FPGA/ASIC design services and distribution of cutting edge Electronic Design and Automation Services.

Tools and technologies, especially in the Electronic Design and Automation (EDA) Industry are changing rapidly. It is very essential for all the stakeholders' especially budding engineers and designers to be aware of the latest tools and technologies, otherwise they run the risk of being left behind in today's competitive world.

In order to address the technology and training needs of the academic fraternity as well as the corporate world, CoreEI technologies presents two unique initiatives which aims to produce world class electronic designers and engineers for the future.

CoreEL University Program is a vision to promote various emerging technologies in the areas of VLSI design among the universities and colleges across the country by extending affordable access to Electronic Design Automation tools, development boards, along with World class Training and Technical Support. Our University Program provides access to full suite of software tools as well as low cost hardware development boards for research, graduate and under graduate teaching. Some of our service offerings include

Programmable Solutions:

Software Tools

- ✖ ISE Design Suite: Logic Edition
- ✖ ISE Design Suite: Embedded Edition
- ✖ ISE Design Suite: DSP Edition
- ✖ ISE Design Suite: System Edition

Xilinx Development Boards:

- ✖ Spartan 3E
- ✖ Spartan 3E Starter Kit
- ✖ XUPV2P Development Platform
- ✖ University Trainer Kit
- ✖ XUDVS Development Platform

Student Boards:

- ✖ Nexys2
- ✖ Basys

EDA Solutions:

- ✖ Mentor Graphics Higher Education Program Tools
 - ✖ Backend (IC Nanometer tools)
 - ✖ Frontend (Design Verification & Test tools)
 - ✖ PCB Design Tools

Engineering Simulation:

- ✖ Opal RT -e- Drivesim (Power Electronics)
- ✖ Opal RT -e- Megasim (Power Systems)

Sandeepani is the training division of CoreEI Technologies Pvt. Ltd, offering training in VLSI/Embedded Technology for more than 9 years now.

Sandeepani has state-of-the-art facilities for high-end VLSI, Programmable Logic and system design training. Facilities include modular classrooms, fully networked and web-enabled UNIX and Linux workstations for every student apart from high end Windows based systems. We offer the following training solutions

Professional Development Courses

This training enables fresh engineering graduates (BE/BS/MS/ME/Mtechs.) to acquire real time industry exposure and knowledge. Our students on completion of their training program are job-ready and hence become productive from day one. Our programs in this area are

- ✖ Professional Development Course in VLSI Design
- ✖ Professional Development Course in Embedded System Design

Corporate Training Programs

We also conduct the following Corporate training programs

- ✖ Xilinx Based Training Programs
- ✖ Mentor Graphics Based Training Programs
