

LED bulb

GlacialTech has launched the Glacial-Light GL-BR20 (5W) AC-LED high-brightness globe for AC light sockets. As per the company, the long-life LED bulb (20,000 hrs) has high luminous efficacy. It reduces environmental degradation through cost-effective energy savings and CO₂ reductions.

GL-BR20 lights use standard E26/E27 type, GU10 type and B22 type sockets. There are two versions of models released, one for 110V AC and the other for 220V AC. The sockets are specially designed so the LED can fit any lamp fixture.

GL-BR20 LED lamp is used for home security, flood lighting, spot lighting, accent lighting and local lighting, and with the special AC LED, it does not require a DC driver, reducing costs considerably. The new LED lamp series is also able to support the dimming function.

NETWORKING

Wireless-N essential high power router

Buffalo Inc. has launched its WHR-HP-G300N, Wireless-N essential high-power router and access point in India.

It is an ideal solution to connect PCs and laptops wirelessly to the Internet.

With transfer rates up to 300Mbps, the WHR-HP-G300N is also ideal for upgrading your existing wireless

network, providing greater speeds and coverage than Wireless-G.

It has a wireless distribution system (WDS) which extends your wireless network across access points. The removable adjustable antenna can help in eliminating the dead spots by fine-tuning the antenna positioning.

With AOSS (AirStation one-touch secure system), it wirelessly connects other AOSS devices with the push of a button.

Unified security gateway

ZyXEL Communications has launched ZyWALL USG (unified security gateway) 100. It offers multiple WAN settings from Dual WAN to Hex WAN. In addition to this, you may even integrate Dual 3G adaptor as WAN on the same product. Within all these WAN, you can configure it for load balancing and failover.

It also acts as a prominent bandwidth manager. Users can define granular bandwidth management profiles on the basis of applications, zones, users, etc.

With high flexibility, it establishes secure IPSec and/or SSL communication tunnels amongst multiple locations such as remote branch offices, business partner sites and even unreliable hotel hotspots. Integrated with cutting-edge technologies on a robust platform, the ZyWALL USG 100 provides multi-layered security protection. Its Kaspersky-powered anti-virus service claims to offer the world's shortest response time to help keeping viruses or malware out of corporate networks.

MISCELLANEOUS

Cosec Sigma access control system

Matrix has launched Cosec Sigma access control system, which is designed

to provide access control and time and attendance solution for medium and large enterprises.

Its master-slave hardware architecture allows you to start as a small set-up which can expand easily with the growing business. It

comes with a Web-based management software that can monitor and control up to 1000 locations, 75,000 door controllers and 5 million users in real-time.

Active harmonic filter

Amtech Electronics (India) has introduced the Expert-ActiVSINE active harmonic filter. It consists of an IGBT-based switching unit controlled by DSP (digital signal processor) and

current sensors to sense load current.

It senses the total current in the

non-linear load and compensates harmonic current so that the current drawn from voltage source is sinusoidal. It is available from 25A to 200A harmonic current compensating capacity, in a single module.

The modules can be paralleled to enhance the capacity. The active harmonic filter features shunt connection, offers easy selection of known parameters, flexible upgrading/redundance, selective harmonic elimination and is programmable by DSP.
