

Why

you should know more about

batteries

Most power backup problems are caused by the battery, not the UPS.

Selecting the battery carefully can cut total cost of ownership, reduce power consumption and help save the environment.

To know more about choosing the right battery for your needs visit www.relicellbattery.com

VRLA and Tubular batteries

VRLA Batteries - 12V 7AH to 250 AH
Tubular Batteries - 12V 100AH to 210 AH

Part of a Rs.1000 crore IT industry group
Tested and certified by Central Power Research Institute, Bangalore (CPRI) and Electronic Test and Development Centre (STQC Directorate, Ministry of Information Technology, Govt. of India). Download Test Certificates at www.relicellbattery.com

UL Certified

VRLA Batteries approved and registered in DGSD for government purchases

Solar Charger

Arun Kumar Vadla's solar charger project article in your magazine's September issue was impressive. I would like to discuss the potential of this item with him.

Deepak Jain

Director, Bhansali Cables & Conductors Pvt Ltd, New Delhi

EFY Top 100

On behalf of Datamatics Global Services, I congratulate you on a fabulous compilation of the top 100 electronics and IT companies in India. I also thank you for listing our firm in the Top 100.

Datamatics Global Services Limited was born after a successful amalgamation of the IT services and BPO divisions of the Datamatics Group. Since the completion of the exercise in January this year, we have embarked on a strategy to be an end-to-end business and technology solutions provider. This fact has been aptly mentioned in the write up that accompanies the revenue/profit graph in the 'EFY Top 100' listing. Looking forward to interact more with EFY.

MEMS Accelerometer and Gyroscope

I am a regular reader of EFY. It keeps me in touch with the latest developments in electronics. The articles on 'MEMS Accelerometer And Gyroscopes: A New Meaning to Motion Sensing' and 'Claytronics: Enabling Teleportation' in EFY's November issue were quite informative. I request you to start a separate column on power electronics.

Manash Jyoti Chetia
JEC, Jorhat, Assam

EFY Software

In the 'Quiz Program in JavaScript' article, which appeared in November issue, it was mentioned at the end that the complete source code has been included in the EFY-CD. However, the source code was not

available in the CD!

Jagdish Gupta
Baran, Rajasthan

EFY: Thanks for pointing out the error! The source code will be included in the EFY-CD accompanying January issue. We regret the inconvenience caused.

RPM Counter

I have some doubts concerning 'RPM Counter Using Microcontroller AT89C4051' project published in the October issue. On page 64, first column, second para, the text reads: "Data pins D0 through D7 of the LCD are connected to port pins P1.0 through P1.7 of the microcontroller, respectively. Control pins E, RS and R/W of the LCD are connected to port pins P3.2, P3.5 and P3.7, respectively." But the port pin P1.0 is not shown in Fig. 2. Is D0 pin of the LCD connected to port pin P3.1 of microcontroller correct?

Partha Banerjee
Through e-mail

EFY: The text in the article is correct but the circuit connection is wrong. The D0 pin of the LCD should be connected to port pin P1.0 instead of P3.1. Thanks for pointing out the mistake!

Back issues

I am a subscriber to EFY and I am interested in some of your articles published earlier. I have gone through the "http://www.efymag.com/" website but could not access any of the articles. Please let me know how to access the EFY articles online.

Parul Patel
Bangalore

EFY: You have to go through a registration process on www.efymagonline.com website and subscribe to EFY issues on it using your credit card to have an access to those articles.

ERRATA

In the 'Why STB manufacturing is not picking up in India' article published in November issue, the name of the company towards the end should be read as 'NXP Semiconductors' instead of 'NXP Semiconductor.' We regret the typographical error.
