

tronics manufacturing throughout South and East Asia. In addition to the on-site manufacturing of critical gases, BOCI's partnership with Moser Baer focuses on employing technology solutions to optimise gas usage as well as India's first on-site total gas management (TGM) service.

Wipro enters security market

Wipro has made its entry into the growing security market in India. Targeting home and office environments, Wipro Consumer Care and Lighting has launched security products like access control, intrusion panels, intrusion alarms, video door phones, gas and fire detectors and CCTV.

Being a new entrant to this space, the company wants to study the market in the initial year before chalking out its growth strategy.

IBM opens analytics centre in Bengaluru

IBM has set up a Business Analytics Center of Competency in Bengaluru to focus on the growing business analytics market. The new centre is expected to have a staff of over 200 consultants. These experts will collaborate with local client teams to provide advanced solutions that apply analytics to a company's most complex information-based challenges and biggest opportunities.

The centre will focus on Web 2.0 analytics, risk and fraud analytics, financial analytics, customer analytics and enterprise business analytics strategy.

Aldec opens office in Bengaluru

Aldec Corporation, an electronic design automation (EDA) company, recently opened a new Aldec-South Asia regional office in Bengaluru. The new India operation will enable Aldec to better serve its design and verification engineering customers in India and future support across South Asia.

The office will initially be focussed on sales, marketing and technical support for Aldec's products in India, with planned expansion in software development and testing.

BEL bags Raksha Mantri award

Indian PSU Bharat Electronics Limited (BEL) recently won the Raksha Mantri's 'Excellence Awards' under various categories for the year 2007-08. The four units of BEL winning Raksha Mantri award are: BEL-Hyderabad, BEL-Ghaziabad, BEL-Bengaluru and BEL's Central Research Laboratory at Bengaluru.

Nilekani receives Yale University award

Yale University recently felicitated the chairman of India's Unique Identification Database Authority and Infosys' co-founder Nandan Nilekani with the 'Legend in Leadership Award.' Nilekani is the first Indian to receive this award.

The award was created 20 years

ago to honour current and former CEOs who serve as living legends to inspire chief executives across industries, sectors and nations.

In 2006, he was awarded the Padma Bhushan, one of the highest civilian honours awarded by the government of India.

Delta named best telecom equipment manufacturer

Delta Group has received BSNL's 'Best Telecom Equipment Manufacturer' award in the switch mode power supply category for the year 2008-09. Delta was recognised for its leadership in DC power systems for outstanding product quality, manufacturing infrastructure, field performance reliability, years of relentless service and efficient co-ordination.

Nokia recalls 14 million chargers

Nokia has announced a charger exchange programme to replace 14 million chargers of its Nokia 7210 handsets. Customers having Nokia AC 3E chargers bought along with Nokia 7210 between 15th June and 9th August in 2009 can exchange them for free.

In India, the programme is limited to charger model AC-3E only. This, according to the company, does not impact the usage or safety of the Nokia phone in any manner.

During a routine quality control process, Nokia said it identified a potential product quality issue with certain chargers manufactured by China's BYD Co, one of its third-party suppliers. The plastic covers of the chargers may become loose, exposing the charger's internal components. This could pose danger of electrical shock.

Dell enters smartphone market

Dell will sell its first smartphone in China in late November, followed by Brazil towards the end of the year. The new phone from Dell is named Mini 3 which uses Google's Android, a mobile operating system running on the Linux kernel. However, the PC manufacturer didn't disclose further technical details

of the phone.

Dell will distribute its new Mini 3 smartphones through China Mobile, the largest telecommunications company in the world with more than 500 million customers, and Claro, which serves more than 42 million people in Brazil as part of the America Movil network.

United Technologies to buy GE's security business

United Technologies Corp (UTC) has reached an agreement to purchase the security business from GE for \$1.82 billion. The deal closing is pending for regulatory approvals. This acquisition will strengthen the company's North America footprint and complement its existing fire and security businesses.

GE Security, part of GE Technology Infrastructure, supplies security and safety technologies through a broad product portfolio for commercial and residential applications.

Nokia Siemens to slash 5800 jobs

Nokia Siemens has announced plans to eliminate 7 to 9 per cent of its 64,000 global workforce, or up to 5800 jobs, as part of its \$550 million cost-cutting drive. According to the company, despite having fully achieved the original merger integration savings objectives of Nokia Siemens Networks, changes

Awards
