

Cool it.

At 2 μ W, the Industry's Lowest Power FPGAs.

You can't get any cooler than Actel's IGLOO® FPGAs. And with the industry's widest range of packages—as small as 3x3 mm—you also can't get any smaller. IGLOO FPGAs are perfect for all of your portable, battery-powered applications, and anywhere you need to stretch your power budget to the maximum.

Designing products for the industrial, communications or automotive markets? IGLOO devices are perfect for that, too. As long as power matters, Actel FPGAs should be at the top of your list. Find out more at www.actel.com/igloo
