

**AFFORDABLE
INNOVATIONS
DELIVERED**

IVU-3 is a Mobile / Stationary Data Acquisition and Control Unit with Multiple Communication Interfaces.

Specifications:

- 32 bit Microprocessor based system
- All Inputs are Isolated and can accept 5-24V DC
- Relay Contacts with 1Amp Rating
- Analog Inputs can accept 0 to 12V , with 12 bit ADC.
- GSM / GPRS capable Modem
- 20 Channel GPS receiver with high sensitivity
- 10/100Mbps Ethernet LAN Interface with Running TCP/IP.

Applications:

- IVU-3 can be used in mobile as well as static applications. This allows IVU03 to be used for
- Vehicle Tracking
 - Stationary Data Acquisition and Control requirements in many industry segments.
 - Campus Wide monitoring and control by networking multiple units with Zigbee / Ethernet to achieve lower installation and communication costs.
 - Location sensitive monitoring and control applications with the built-in GPS receiver.

Features:

- 8 Digital Inputs, 4 Relay Outputs and 6 Analog Inputs.
- Communicates through GSM/GPRS, Ethernet LAN and Zigbee Wireless Interfaces.
- Built-in Multi Channel GPS receiver.
- Non Volatile Memory for Data Backup
- Voice Channel
- Internal Battery Backup

Our Products

Serial to TCP/IP Converters • MODBUS TCP/RTU/ASCII Converters
• RFID LF/HF Readers • SNMP Adapters • GSM/GPRS Modem • Serial to PPP (TCP/IP) Converter • Custom Developed OEM Products

Applications in which our Device Servers are in use

Access management in Hospitality with Keycard Systems
• Attendance Monitoring • Barcode Solutions • CNC Machine Control
• Industrial Automation • Moving Digital Display Board • Patient Monitoring
• Point of Sale Terminal • Telecom Switch Monitor and Control • UPS Monitoring • Vending Machine Control and Monitor • Video Projector Remote Management • Weighing Bridge • Windmill Monitoring and Control

Also available from SPARR, world class solution from:

LANTRONIX®

The World Leader in Enterprise Device Networking. Lantronix products offer rugged, reliable and secure networking and connectivity solutions. For more information please visit www.lantronix.com.

SystemBase

★ New high range model available

SystemBase offers Industrial Device Connectivity for all Serial Communications. Products offered include Multiport Serial cards for PCI, ISA, PCMCIA and USB, Serial to Bluetooth Wireless, Port Powered RS232/RS485 Converter etc. For more information please visit http://www.sysbas.com/e_main.html.

SPARR Electronics Ltd., (SEL), is a company based in Bangalore, India, engaged in the development & manufacturing of need based innovative products in the field of electronics & telecommunications. SEL also distributes hardware & software products from leading international companies.
