KEYBOARD-MOUSE COMBO

LOGITECH'S WIRELESS MK 250 GIVES 10 METRES OF WIRELESS FREEDOM

Logitech has launched Wireless MK 250, which offers a keyboard-and-mouse combination matching a variety of computer setups.

Features & USP. Wireless MK 250 gives you a long-range wireless connection, eliminating delays, drop-outs and interferences. It offers you the 2.4 GHz wireless technology that allows to operate a desktop from a distance of up to 10 metres.

MK250 provides up to six months of battery life for the mouse and 15 months for the keyboard. The battery life indicator light offers smart power management options.

The contoured mouse is designed to fit comfortably in hands. And, by simply connecting its mini USB receiver, you can start using your keyboard and mouse right away.

SLIM LCD MONITORS

ASUS' DESIGNO MS SERIES OFFERS 40 PER CENT EXTRA POWER SAVING

ductivity level.

Features & USP. The series consists of 50.8cm MS202D, 58cm MS236H and 60cm MS246H monitors. Inspired by the 'binary state', the monitors incorporate a host of contrasting elements like straight lines, circles and black and white into the monitor with a 16.5mm profile.

The spherical ring stand uses the Ergo-Fit technology that enables users to adjust the monitors' tilt angle with one finger. With full HD 1080p, 50,000:1 contrast ratio, 2ms response time and ASUS' Splendid Video Intelligence technology, the monitors save 40 per cent extra power. The brightness of these monitors is touted at 250 Cd/m².

The monitors' intuitive settings can be adjusted with a simple touch of their LED sensor buttons.

ASUS has launched the new Designo MS series of LCD monitors—MS202D, MS236H and MS246H. The company claims that when paired with notebooks through the DVI/VGA cable connection, they double the pro-

GizMo ByTes

Sony's 1000 Ringtones DVD for iPhone

Sony's creative software division has launched 1000 Ringtones, a DVD primarily intended for iPhone users. The collection contains both M4R (iPhone ringtone file) and MP3 files, of which the former can simply be added to iTunes for later device sync. The MP3s are meant for a broader selection of phones, such as those made by Sony Ericsson.

CoMix on-the-go

Tata DoCoMo has introduced a value-added service called 'CoMix on-the-go.' It enables users to read full comics books on the mobile. It also features special effects like character vibration, sounds and zooming text bubbles.

Nokia S60 gets Google 'Search By Voice'

Google India has launched a downloadable Google Mobile Application for Nokia S60 (most N and E-series models like N 86, E-63) users. This will enable easier and faster access to Google Search. Google Mobile Application is equipped with speech recognition technology designed to understand various Indian accents.

Secure mobile messages with eMudhra SecMsg

3i Infotech Consumer Services Ltd has launched the eMudhra SecMsg mobile solution to secure the SMS channel of communication. Messages sent using SecMsg are encrypted using a globally accepted encryption method called PKI to ensure that the messages are decrypted only by the intended user.

PayPhrase: a shortcut for paying on Amazon.com

Amazon.com has launched Amazon PayPhrase to simplify the process of buying online. To use PayPhrase, consumers need to set up a unique phrase and a 4-digit PIN, which links to their Amazon.com account where a shipping address and payment information is stored. When shoppers make a purchase on Amazon.com or other participating websites, they can see an order confirmation and check out in seconds.
