

## 2/4 Channel Digital Storage Oscilloscopes

DS1000 Series

**DS1000 Series**  
Digital Storage Oscilloscopes have  
1 GSa/s & 2 GSa/s real-time  
sampling rate and 50 MHz to  
300 MHz bandwidth.

Advantages: 1 Mpts memory depth, set of  
Trigger modes Alternate, Slope, Pulse Width,  
Video, Edge, Waveforms refresh rate  
2000 waveform/Sec. 20 automatic  
measurements, 10 waveforms, 10 setups, BMP  
and CSV storage, Math functions, USB Device/Host,  
Ultra zoom, 16 Channel Logic Analyzer.

**VS5000 series** have 2 analog channels and  
16 digital channels, 400 MSa/s real-time sample rate,  
25 GSa/s equivalent sample rate, and 1M memory depth.  
Advantages: A true Mixed Signal Oscilloscope (MSO) with a  
16 channel Logic Analyzer, Ultra compact design, Built-in  
FFT, Frequency Counter, 25 MHz to 100 MHz Bandwidth,  
20 automatic measurements, High speed USB 2.0 and LAN  
Interface.

**DG Series** is the latest series of economical Function /  
Arbitrary Waveform Generators based on advanced DDS  
technology having 100/300 MSa/s of sample rate, 14 bits of  
vertical resolution, 4 k points of memory depth. DG1000  
series have a unique built-in Frequency Counter, range up to  
200 MHz.

Advantages: Built-in Frequency Counter up to 200 MHz,  
10 standard waveforms, Arbitrary waveform of 512 kpts  
length defined by user, Versatile input and output Digital  
synchronous, USB Host, Seamless connectivity with DS  
series digital oscilloscopes, Multi-language user  
interface, built-in help system.

**DM3000 Series** are excellent Digital Multimeters  
with high precision & accuracy, multiple function  
and automatic measurements.

Advantages: True RMS AC voltage and  
current test, 16 channels Multiplexer  
Module and Ultra logger software,  
10 sensor setups, 26 test functions,  
Built-in Storage, GPIB, LAN,  
RS-232, USB Device/Host to  
support USB flash  
memory and USB  
printer.
