

TABLE VIII
Octal Table of Numbers with Decimal

IDS equivalent	Octal No.	New figure	Read new name as
(12.7)	(14.546)	14,546	Read as one-four comma five-four-six
(16.5)	(20.400)	20,400	Read as two-zero comma four-zero-zero

TABLE IX
New Representation for 'A' to 'F' of Hex

Decimal: Ten	Eleven	Twelve	Thirteen	Fourteen	Fifteen	
Hex: A	B	C	D	E	F	
New	dasha-	eka-	dwa-	trie-	chatur-	pancha-
Name:	mah	dashah	dashah	dashah	dashah	dashah
New	7	i	2	3	4	5
Figure:						

TABLE X
New Representation for Single-digit Numbers of the HdS

IDS	HdS	Old Name	New Name
0	0	Zero	Shoonyah
1	1	One	Ekah
2	2	Two	Dwityah
3	3	Three	Tritiah
4	4	Four	Chaturthah
5	5	Five	Panchamah
6	6	Six	Shashthah
7	7	Seven	Saptamah
8	8	Eight	Ashtamah
9	9	Nine	Navamah
10	A	A	Dashamah
11	B	B	Ekadashah
12	C	C	Dwadashah
13	D	D	Tridashah
14	E	E	Chaturdashah
15	F	F	Panchdashah

The style of figures of the hex system is in Georgia fonts. There are six more additional figures. These numbers are not only beautiful but are written in alphabet-style. Hence they look different.

Rule II (the video test): To give a visual orientation of personalised figures to the BS, the OS and the HdS.

Rule III (the textual test): To redefine all the five counting systems in the wake of the above modifications such that they are unique to audio-visual inspection in figures and words. Overlapping is to be forbidden.

Rule IV (the machine test): To re-

strict the IDS

Category 1, System 2: the RS
In the second category, we have three related systems reserved exclusively for computer input. These are:

Category 2, System 1: the BS
Category 2, System 2: the OS
Category 2, System 3: the HdS

In so far as streamlining is concerned in Category 1, there is nothing much to be said.

strict and restructure the spellings and figures of numbers used in all the five systems so that the input to the machines is not ambiguous.

Application of these simple rules would place all the counting systems on

a logical and scientific pedestal unlike their hitherto helter-skelter structures.

Rule I caters to the visually challenged by identifying the system by the numbers being called. Rule II serves the hearing impaired. Rule III is complementary in giving support to the first two rules. Rule IV is machine oriented.

The five numbering systems may now broadly be reclassified into two categories based on the services rendered by them to the end users:

Category 1: Used by men

Category 2: Used exclusively in machines

In the first category, we have two systems:

Category 1, System 1:
