ing technology infrastructure, such as copper cable networks, could be integrated into a new optical infrastructure to provide long-term benefits.

Governments, universities and ICT specialists in both the countries will work on next-generation telecom networks, ICT services and applications under the BT-backed collaboration, which is aimed at pushing forward the digital economy.

Funding will be used by the India-UK Advanced Technology Centre (IU-ATC) to drive collaborative research and the sharing of new communications technology between India and the UK. The wider IU-ATC consortium currently comprises nine UK universities, six Indian research institutes, seven industry partners in both countries including BT, Infosys, Wipro, Sasken, Tejas and Midas, and a number of small business partners.

Microsoft inks education MoU with Gujarat

Microsoft India has signed an MoU with the Gujarat government to enhance the use of IT in the state education sector. The agreement was signed in the presence of Narendra Modi, chief minister of Gujarat, at the *Vibrant Gujarat* global investors' summit. As part of the agreement, Microsoft will enable educators in the state to connect with each other and increase access to technology.

A focal part of the agreement will be building IT readiness in both pre- and in-service school teachers under Microsoft's Partners in Learning global programme that provides the education community with resources and training. In India alone, more than 270,000 teachers have already been trained and empowered by it. The MoU also entails the adoption of

FLUKE

Fluke 62
INR 4400.00
