

Illustrated Programming with C++

Object-oriented programming (OOP) models the objects in the real world and their interactions. C++ is a popular OOP language. This book consists of fourteen units and four programming projects. The latter are small but non-trivial programming assignments that are meant to test the comprehension of the concepts learned in the previous units. The fundamentals of OOP and C++, data input/output, data types and operators, control structures, standard library functions, user-defined functions and function overloading, arrays, pointers and strings are described in the first six units.

The units seven through fourteen are devoted to the important features of OOP, such as classes, objects, constructors and destructors, inheritance, polymorphism, standard data structures such as stacks, queues, linked lists and binary trees.

Telecom for Dummies

Telecom for Dummies contains everything you need to know to order, maintain and troubleshoot basic phone services. It covers the nuts and bolts of how phone systems work, why they work and why it sometimes takes so long for them to work. When you have questions, simply track down the chapter and subsection that covers the issue in question, and after a little reading, you should be able to talk to any technician with confidence.

The first few parts cover finding a phone service that best suits your business needs. Another part provides the ins and outs of ordering what you need. If you already have a phone system setup, move to the part that covers what you need to know to troubleshoot the circuits and systems you've installed.

CONFORMAL COATINGS CONFORMAL COATINGS CONFORMAL COATINGS CONFORMAL COATINGS CONFORMAL COATINGS

You want

- Solvent removable and solvent resistant coatings
- Thinners and masking products
- UL, IEC and MIL approval
- UV trace to aid inspection
- Water based and non VOC

A Spectrum of Electro Chemicals

You need
electrolube.com

Electrolube manufacture a wide range of high performance chemicals used extensively by the international electronics and manufacturing industries.

Automotive	Traction	Marine	Service
Military	Industrial electronics	Utilities	Repair
Aerospace	Consumer electronics	Medical	Maintenance
Transport	Telecommunications	Education
