At that price point, you'd expect the new addition to the MSO/DPO family to have modest goals. Don't tell that to the MSO/DPO2000 Series. You see, with up to 200-MHz bandwidth, 1 GS/s sample rate, and as many as 4 analog and 16 digital channels, it's more than ready for mixed-signal debug. It even offers advanced features like Wave Inspector® for navigating long records and automatic decode of serial buses just like the other members of the family, the DPO3000 and MSO/DPO4000 Series. With a heritage like that, the MSO/DPO2000 Series is sure to exceed expectations.
