including the same 10-point IRE system and full colour management controls. A new 'picture wizard' is available as well, which uses a series of onscreen test patterns to ease user calibration.

The LH85 series will be available in May.

Most eco-friendly mobile

Samsung Electronics' F268 handset has been named as the greenest mobile phone by leading environmental campaigning organisation Greenpeace International. The F268 competed with the Motorola V9, the Nokia 3110 Evolve, the Sony Ericsson C905 and the LG KT520 in the handset category.

The Samsung F268 doesn't use brominated flame-retardant (BFR) and polyvinyl chloride (PVC). Neither the device nor its accessories (including the charger and headset) contain PVC, and all the components are also entirely free from BFRs.

In addition, the F268 has an alarm function that tells users to unplug their charger when the device is fully charged. It also fully complies with the strict energy-efficiency guidelines established by the US Environmental Protection Agency and the US Department of Energy.

3G wristwatch phone

At first glance, the wearable LG-GD910 appears to simply be a high-end timepiece. LG said it used materials and stylistic elements found in watches from top manufacturers to ensure that people will be comfortable wearing it for any occasion.

Most eco-friendly mobile
Samsung F268

The 13.9mm thick Watch Phone has a curved tempered glass face and high-quality metal casing. It is claimed to be the first touch watch phone in the world to feature 7.2Mbps 3G HSDPA compatibility, enabling high-speed data transmission and video phone calls using the built-in camera.

The watch phone is fully capable of sending text messages, making phone calls, and, of course, keeping accurate time. This is all achieved using the phone's touchscreen interface on its 3.6cm screen and LG's intuitive flash interface.

Voice recognition features, which can be used

with or without a Bluetooth headset, make it easier to place calls and look up contacts. Text-to-speech reads text messages and other information out loud for even greater convenience.

World's slimmest TV

South Korea's Samsung Electronics has unveiled what it claims to be the world's slimmest LCD TV.
