SLIDING MUSIC PHONE

THE MOTOYUVA EM325 IS A BUDGET MUSIC PHONE WITH VARIOUS FUNCTIONALITIES

Price: Rs 5599

Motorola India has added yet another phone to its MOTOYUVA series. Sleek and stylish, the MOTOYUVA EM325 is a slider music phone. It offers a great mobile music experience with one-touch access to MP3 library, a universal 3.5mm jack, ample space for music with up to 2 GB of removable microSD memory and drag-and-drop USB 2.0 technology that enables you to change music collection quickly to suit changing moods.

The EM325 also takes radio listening one step further. You can share information about a favourite station with friends by sending it in a text message. Create playlists and organise songs by genre, artist or album. Record excerpts of songs from the phone's FM radio along with RDS functionality, which shows the name of the artist, the song and the genre of music playing. In addition, you can set an FM alarm and listen to FM radio via stereo earphones or speakerphone.

The phone has a built-in 1.3MP camera with 4x zoom and auto-save option.

MULTIMEDIA PROJECTOR

CANON HAS RELEASED XEED SX800 PROJECTOR WITH SXGA+ RESOLUTION FOR THE BUDGET-CONSCIOUS

Price: Not available

Canon has launched an SXGA+ (1400x1050) resolution multimedia projector. With no compromise on reliability and image quality, the XEED SX800 boasts of user-friendly features.

The LCoS (liquid-crystal-on-silicon) reflective LCD panels ensure reproduction of high-resolution images free of the lattice/screen door effect—a visual distraction common

to LCD projectors, in which a faint grid pattern appears over the projected image.

The projector delivers 3000 lumens of brightness at a

contrast ratio of 900:1. This makes it highly capable of reproducing photographs, detailed spreadsheets and small text with ease. 1.5x powered zoom/focus lens delivers increased resolution and suppression of lens aberrations. The 10:0 lens offset eliminates the need for tilting and/or keystone correction. For additional convenience, the XEED SX800 comes with an auto setup system that manages auto keystone and auto input selection.

FASTEST HANDHELD INTERNET DEVICE

DATAWIND'S PocketSurfer2 DELIVERS THE FULL POWER OF THE DESKTOP WEB, RAPIDLY AND WIRELESSLY, TO THE PALM OF YOUR HAND

Datawind claims its PocketSurfer2 to be the world's fastest handheld Internet device that delivers the full power and original graphic intensity of the desktop Web, rapidly and wirelessly—to the palm of your hand. It downloads webpages within 7 seconds.

Weighing 174 grams, the ultra-thin handheld device offers free Internet usage of 35 hours per month for a whole year.

The PocketSurfer2 features a 640-pixel, colour, wide screen displaying webpages in their original layout

Price: Rs 11,990

with HTML, graphics, JavaScript, Ajax, Frames and other Web functionality. Its QWERTY keyboard allows you to easily compose e-mails or interact with websites. The PocketSurfer2 also includes a built-in GPS receiver for location-based services. It is being distributed in India by HCL Infosystems.
