STORAGE

Swiss Knife-style USBs

The Swiss Memory USB, produced by Swissbit in cooperation with Victorinox, combines tradition, innovation and cutting-edge technology. It is available in 1GB and 2GB versions. The USB is automatically recognised as an exchange data carrier when inserted in the USB port.

Flight version is also available. It is not equipped with scissors,

knife and file, so you don't face any problem when passing through the baggage control point at the airport. The

Flight version comes with an integrated ballpoint pen. Red or white LEDs provide illumination to help you search in the dark. The laser-pointer versions let you highlight important messages during presentations.

The 1GB Swiss Memory is priced at Rs 4950, while the 2GB model is available for Rs 8190. The laser pointer versions cost Rs 5540 (for 1GB) and Rs 7750 (for 2GB), respectively.

Blu ray disks

Imation India has introduced the TDK LoR's new Blu-ray disks that are capable of recording at 4x speed. The disks are available in the BD-R25 (single-side, single-layer, 25GB), BD-R50 (single-side, dual-layer, 50GB) write-once, as well as BD-RE25 (single-side, single-layer, 25GB) and

BD-RE50 (single-side, dual-layer, 50GB) rewritable models.

4x speed reduces recording time

by half compared with the previous 2x disks. 4.7 GB of data can be copied in less than 5 minutes, which is comparable to the DVD-R recording speed of 16x.

POWER SUPPLY

Online UPS

Delta claims to have launched the thinnest, lightest and smallest online UPS systems in India. The new UPS-R Series—use true-online

double-conversion topology. These come with high power density and adjustable LCD for easy rack or tower convertibility. Input power factor correction up to unit results in lower electricity bills and minimises harmonics.

The R series UPS are designed for applications like medium-size data centres, BPOs, software development centres, telecom and audio-video equipment, process automation, biomedical test and diagnostics equipment, etc.

TEST & MEASUREMENT

Digital temperature indicators

Thermocab Instronics offers digital temperature indicators for temperature range of -200°C to +2200°C. These can be used with different types of thermocouples (K, J, T, R, S, N, C, etc) and RTDs.

The indicators are available in different models, including the DTM 100 battery-operated mobile/portable unit for -200 to 600°C and DTM 101 for 0 to 1200°C. Also there is a mains-operated model (DTI 101) which is available in different panel cutouts and suitable for temperature range of -200 to 600°C.
