COMPONENTS

SD multi-decoder chips

Fujitsu Microelectronics Asia Pte Ltd (FMAL) has launched multi-decoder LSI chips that support decoding of MPEG-2 and H.264 video compression formats for standard-definition

(SD) video.

The chips are ideal for TV and set-top-box (STB) equipment targeted at the Russian, eastern European and China markets. These support the DVB broadcasting standard used in those regions, with MPEG-2 and H.264 decoders integrated into a single chip with the functionality necessary for receiving SD broadcasts. Proprietary H.264 decoder technology provides low power consumption, while small packaging makes these decoder LSIs ideal for portable devices like personal navigation devices with built-in TV receivers.

CPU coolers

GlacialTech has launched the UFO V51 range of CPU coolers for gaming and other high-input/output applications. Sporting a UFO-like design, the UFO V51 coolers are made up of two 92mm ultra-silent fans, four heat-pipes, aluminium fins, long-life sleeve bearings and a stylish plastic encase.

The CPU coolers are available in two versions, UFO 51 Silent and UFO 51 PWM. These come with an Intel LGA 775 or AMD (754/939/940/AM2/F) socket and are compatible

with Intel Core i7, Core 2 Extreme, Core 2 Quad, Core 2 Duo, Pentium Extreme, Pentium Dual-Core, Pentium D, Pentium 4, Celeron Dual-Core, Celeron D and Celeron; as well as AMD Phenom, Athlon 64 FX, Athlon 64 X2 dual-core, Opteron and Sempron.

NETWORKING

Broadband router with print server

Edimax Technology has launched the wireless 802.11b/g 3G multifunctional broadband router with print server. The 3G-6200Wg is a cost-effective, high-speed, IP-based

router that enables multiple users to share a single Internet connection via an ADSL or cable modem.

When connecting a 3G/3.5G USB modem card to 3G-6200Wg, all network (wired/wireless) users can share the 3G/3.5G Internet connection. 3G-6200Wg can support 3G/3.5G speed up to 7.2 Mbps. 3G-6200Wg also acts as a print server allowing users to share a printer through the network.
