BEL receives export award

Navratna defence PSU Bharat Electronics Limited (BEL) has been conferred Niryat Shree certificate of excellence for the year 2005-06 in the residual products, non-SST category by the Federation of Indian Export Organisations (FIEO).

HF communication equipment and night-vision devices to Suriname, field telephone exchange to Botswana, satcom equipment to Nigeria and laser range finders to Israel formed the major portion of BEL's export during the year 2005-06.

cess to these services during the test phase. Currently, 3G Jadoo will be made available at Connaught Place, Sanchar Bhawan, Rajaji Marg, India Gate, Pragati Maidan, Delhi Gate and Minto Road.

MTNL, a service provider in Delhi and Mumbai, would extend the 3G services to Mumbai by the end of January. Chennai too will get to experience 3G services through BSNL. The government is expected to allocate 3G spectrum to at least five private players subject to the availability of frequency in each circle.

Bangalore declared as nanocity

Bangalore was declared as the *Nanocity of India* at the 2nd Bangalore Nano event held recently in the city. On the occasion, the government of Karnataka promised to take every possible measure to encourage R&D of nanoscience and nanotechnology, create opportunities for commercialisation of nanoscience, and facilitate development of small-, medium- and large-scale units committed to nanotechnology.

In addition to budgetary support, the Karnataka government has allotted land for setting up India's first nano institute—Institute of Nano Science and Technology—in Bangalore. Further, the Karnataka government is planning to develop a nano park and incubation centre.

No more Sony CRT TVs in India!

Sony has decided to exit completely from the CRT TV business in India.

"We used to import CRT TVs from

Malaysia, Indonesia and Thailand where new production has already been stopped. Accordingly, we intend to phase out CRT TVs from India by March 2009," said Sunil Nayyar, head-sales, Sony India. Currently, the company's CRT TV line is sold under the 'Wega' brand.

Sony India has also revised downward its revenue target for 2008-09 from Rs 40 billion to Rs 38 billion due to the slowdown in sales.

LG reorganises business

LG Electronics has announced strategic changes to the company's structure. At the core of LG's strategy is a re-alignment of the company's four traditional business units (digital appliance, digital display, digital media and mobile communications) into a new structure that includes mobile communications and four completely new business units (home entertainment, home appliance, air-conditioning and business solutions). The reorganisation is aimed at increasing the company's focus on business solutions for tomorrow's challenging environment. The company's business portfolio has been restructured to maximise growth potential in existing businesses while at the same time fully developing new ones.

In addition to the changes to the company's business units, Yong Nam, vice chairman and CEO, LG Electronics, appointed or promoted 48 new executives as part of his sweeping plan to position LG for long-term business success.

NEC launches POS terminals

NEC has expanded its product offerings in India with the launch of a POS

KEYBOARDS

Capacitive Switches

- Simplify mechanical designs
- Simplify assembly process.
- To improve reliability, safety, reduce wear & tear.
- Improve product appearance

Silicon Rubber Keyboards

- Fast and reliable entry possible
- Cost effective for mass production
- Best suitable for access control and hand held instruments
- Preferred for small size keyboard

Vandal-Proof Keyboard

- 100 % Vandal proof Keyboards
- Can be used for ATM, public use applications
- Available in 3 different models

Customised Computer Compatible Keyboard

- Key codes can be customised
- Dust Proof
- Overlay can be Customised to meet user requirement
- Available in a variety of combinations
- Suitable for Cement, Coal Mine, Fertilizer Industry, and Power Plants
