Elent ensures **total safety** of your equipment from all power-related problems...

Elent Constant Voltage Transformers allow only stabilized and pure sinewave power to the connected equipment, thereby protecting it totally.

Elent CVT is highly recommended for areas where the quality of main line power is bad. Since there are no moving parts, Elent CVT is ideal for places where servicing facilities are not easily available.

In case your application requires power back-up, Elent offers a range of hi-performance On-line UPS systems - from 1 to 300 KVA ratings.
