

NEW VERSION
AVAILABLE

NI LabVIEW.

Limited Only by Your Imagination.

Build and program robots with LEGO® MINDSTORMS® NXT using software powered by NI LabVIEW

Develop your human machine interface (HMI) display

Independently control multiple servo motors

Communicate via multiple protocols including Bluetooth

Graphically program concurrent, real-time applications

Target 32-bit microprocessors and FPGAs

Real-Time and Embedded

Signal Processing

High-Performance Test

Industrial Control

PRODUCT PLATFORM

LabVIEW Real-Time Module

LabVIEW FPGA Module

LabVIEW
Microprocessor SDK

NI CompactRIO Embedded
Hardware Platform

When the LEGO Group needed parallel programming and motor control tools intuitive enough for children, it selected graphical software powered by NI LabVIEW. With LabVIEW graphical system design, domain experts can quickly develop complex, embedded real-time systems with FPGAs, DSPs, and microprocessors.
