

Den-On, Japan
SC-7000Z
De-soldering Tool
Globally Best
Recognized Tool
 from
Qmax

- Quite, Compact, and Lightweight.
- Ready to use in any location.
- Low noise and Low vibration.
- De-Soldering tool with built-in pump with a temperature control circuit.
- Very effective in removal of components on multi-layered PTH boards.
- Removal of chip and SMD components can also be done with more ease.
- The temperature can be controlled from 350°C – 500°C through rotary knob.
- Direct connection between the diaphragm pump and the tip, provides high vacuum efficiency, making effective up to 8-12 layered PCBs.
- SMD components removal can be easily done by a flick of the selector lever and by replacing the tip with the hot blow nozzle.
- Combination of a 100W ceramic heater with sensor feedback temp. control circuit and high vacuum capacity can provide best work efficiency with no failure.
- Protection against ESD is secured.

Chipset for dual-mode 3G handsets

ST-NXP Wireless has begun mass production of the world's first 3G unlicensed mobile access (UMA) chipset platform, paving the way for a new range of converged fixed and mobile phones with enhanced multimedia capabilities. The 7210 combines UMA and 3G technology in a single solution, enabling handset makers to gain a competitive edge with the ability to offer a

When in range, you can take advantage of WiFi to download content and make more affordable voice calls than you can over cellular networks.

Browse the Internet without a browser

Rediff.com India has launched a 'Web-in-mail' service—a way to read the Web in the mail. So you can access the Internet content using e-mail clients like MS Outlook, Outlook Express and Thunderbird.

This is achieved in two simple steps: send an e-mail to 'browse@webinmail.com' with the URL (Internet address) of the webpage which

wide range of high-speed handsets.

Dual-mode 3G UMA handsets will allow you to roam and handover between UMTS cellular networks, GSM/EDGE networks, and home or enterprise WiFi access points. In addition to improvements in connectivity and voice quality, the 7210 will deliver data speeds of more than 1 Mbps over UMA.

This new development means you can use one device for fast Internet browsing, streaming video services or access to social networks over the fastest available 3G or WiFi network.

you want to access in the subject line and then a prompt reply is received with the webpage in your inbox. Clicking a hyperlink within the webpage received automatically composes another mail. On sending this mail, another reply mail is received with a new webpage. This service, in its beta version, also allows you to search the Internet. You simply need to send your search query in the subject line and the result mail is received via e-mail.
