

TRONTEK

**RECHARGEABLE
SEALED
MAINTENANCE
FREE LEAD
ACID BATTERIES**

12V 7.5Ah

6v/4.5ah to 12v/100ah.
(2v & 4v Models Available on request)

**Preferred by leading OEMs in
India and All over World**

Trontek SMF Batteries

(Manufactured in the most modern &
contemporary Taiwan-Made Plant)

Have all the winning features:

- Lead-Calcium grid for extended life
- High discharge rate capacity
- Deep discharge recovery
- Low self discharge & long service life
- No memory effect & high performance battery
- Long life & hassle free power

Marketed in India By :-

Trontek Electronics Pvt Ltd.

S-261, Rajinder Place, New Delhi-110008

TV manufacturers will focus more and more on outsourcing rather than manufacturing

—Satish Kaura, chairman and managing director of Samtel

bigger with small memory SD cards and connectivity options. With new excise duty structure, consumers will have more confidence in consumer electronics items.

Products which are selling in India are all those which have low penetration or are nascent in category life-cycle. Most selling are colour TVs and refrigerators but growth is mostly seen in LCD TVs and expensive electronics items. High-end refrigerators, microwave ovens and front-loading washing machines are growing exponentially. Also, the growth is fast in DVD players because of the availability of cheap software.

2009 onwards consumers will show clear preference towards quality and branded products. Though the unbranded market will also grow with entry-level products and categories, the high-end market growth will be higher in India. Key drivers will be high-end televisions and washers. The air-conditioner market will also grow tremendously.

Satish Kaura, chairman and managing director of Samtel, puts the current size of the TV industry at 13 million units for CRT TVs, excluding Tamil

Nadu's demand for 35.6m CTVs which the Tamil Nadu government gives free of cost to families below poverty level, and 700,000 units for LCD TVs. And for year 2009, Kaura predicts a 5 per cent growth in CRT-based TVs (excluding Tamil Nadu's demand for four million TV sets) and a whopping 42 per cent growth in LCD TVs (up from 700,000 units in 2008 to one million units in 2009).

Recent 4 per cent cut in excise duty, modern retail distribution, 7 per cent GDP growth, and trend towards flat and slim category will be the key reasons behind this growth, says Kaura. Most importantly, TV manufacturers will be focusing more and more on outsourcing rather than manufacturing on their own. Large companies even now are offloading the production to original equipment manufacturers.

Sanjeev Keskar, country manager-sales, Freescale Semiconductor India, says that year 2009 will also be a witness to another important trend—move from services to products in electronics and semiconductor space. Though the credit crunch has hurt consumers worldwide, leading to softer spending on electronics, the

Innovations in healthcare and medical diagnostics are set to take off
