- Cassette/MP3 Product Design
- Multiple Device Connectivity
- Global Secure Access
- Live Call Monitoring
- Multi-login Facility
- Comprehensive Call Reports
- Advanced Audio Player
- Data Backup/Retrieval
- Audio Compression Formats

Xtend Voice Logger

A multi-channel call logging tool that implements a simple installation and configuration interface to record audio directed from analog and digital lines. Real-time computer related conversations are recorded from trunk as well as extension lines that can be monitored/viewed at any time by user or personnel in the organisation for performance assessment and quality assurance.

Analog Voice Logger

- USB Product Unit
- 1024/8/12/16 Ports
- Supports 1 to 128 Port per System

Digital Voice Logger

- Records GSM/CDMA
- RDSM (RDSM) Digital PBX Ext.
- Voice Telephony Cards

Browser Interface

Xtend Voice Logger implements a browser-based interface that enables users can access locally or remotely to monitor the calls. The secured browser application with advanced data protection detects unauthorised tampering of audio data. The browser interface supports comprehensive call analysis features to monitor and evaluate the logged call conversations.
