RUGGED MOBILE

INTEX IN3030 CAN WITHSTAND DUST, MOISTURE AND WATER SPLASHES

Price: Rs 3500

Intex Technologies has added IN3030 to its portfolio of mobile phone products. This phone is a music gizmo equipped with water-, sweat- and dust-resistant technology. It features FM radio, audio

player, voice and audio recording. According to Intex, the phone is ideal for those who travel a lot and also for the common man who normally uses the phone with sweaty and dusty hands.

The IN3030 mobile phone conforms to the Japanese JIS (IPX grade 5) standard for water resistance. Its electronic circuitry is protected by a special film and all the joints are effectively sealed by rubber gaskets. You could easily give the phone a quick wash (after closing the charging socket), shake it and use it. It is also designed to perform at very low and very high temperatures with high humidity.

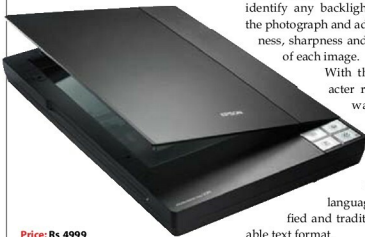

ENTRY-LEVEL A4 SCANNER

THE EPSON PERFECTION V30 SCANNER CONSUMES LESS POWER AND REQUIRES VIRTUALLY NO WARM-UP TIME

Weighing 2.2 kg, the Epson Perfection V30 A4 scanner boasts of an optical resolution of 4800 dpi and 48-bit colour depth. It uses the eco-friendly Ready-Scan LED technology, which contains no mercury, consumes less power and requires virtually no warm-up time. The scanner has four customisable

one-touch buttons for high-quality document and photo scanning. It comes with an easy-to-use photo and document editing software that allows you to restore faded photographs to their original colours, automatically detects and removes dust specks and scratches from scanned photographs, and analyses the image histogram to identify any backlight conditions in the photograph and adjusts the brightness, sharpness and colour balance of each image.

With the optical character recognition software, you can easily convert scanned documents containing English and Chinese languages (both simplified and traditional) into editable text format.

Price: Rs 4999

3G VERSION OF HTC TOUCH

WATCH STREAMING VIDEO FROM YouTube ON HTC'S TOUCH 3G CELL-PHONE

HTC has introduced the Touch 3G for Indian customers. The phone comes equipped with HTC's TouchFLO technology, offering a finger-touch-optimised navigation experience. The phone, which runs on Windows Mobile 6.1, also claims to offer a powerful Internet browsing experience as well as a host of other useful applications such as an Office suite and e-mail client.

You can search for and watch streaming video from YouTube, and stay updated on the latest news with the integrated RSS reader. And with 3G connectivity just around the corner, HTC seems to have timed its release well.
