uid-crystal display (LCD). The other type of screen that you can look for is organic light-emitting diode (OLED). OLEDs will provide you with better display. These screens need no backlighting, thus consume lesser power and have very high contrast and brightness ratio. This makes them better than LCD. But if you go for the mobile phones with OLED screens, you will have to compromise on style and design. So it is better if you look for LCD screens with good resolution

and backlighting features.

Storage capacity and expansion

Standard memory on a typical cell-phone does not have a large capacity to store many photos. The storage need is addressed by using an external memory card; LG offers an internal memory of up to 80 MB in its best-in-class phones like KP320.

Make sure that your phone supports memory cards. Memory cards

BOOKS

Illustrated Programming with C++

Dilip Mail,
Pramod Vasambekar
Price: Rs. 210/-

Fundamentals of Microcontrollers & Applications in Embedded Systems

Ramesh Gaonkar
Price: Rs. 270/-

USB Complete

Third Edition
Jan Axelsson
Price: Rs. 380/-

The Microcontroller Idea Book

Jan Axelsson
Price: Rs. 200/-

PLC & Industrial Automation An Introduction

Madhuchandra Mitra,
Samarjit Sen Gupta
Price: Rs. 200/-

Elements of Artificial Neural Networks

Second Edition
Kishan Mehrotra,
Chulakuri Mohan,
Sanjay Ranka
Price: Rs. 320/-
