LINUX
For You

Supplier Details

EFY is very useful for identifying good suppliers. Wish you all the best.

Sabarathan K.

Quality Management & Methods
(CoC) Bosch Limited, Bangalore

Back issues

I have an extensive stock of back issues of EFY magazine (since 1983). I wish to donate these copies to some good and reputed educational institutes. Those who are interested can contact me at 'klashk@hotmail.com'

Job Advertisements

I am a businessman dealing in electronic and telecom products. I purchase EFY regularly to stay abreast of new products. The best part is that EFY also provides contact details of the manufacturing companies. Thanks for that! It's true that many organisations, professionals and students get help, ideas and other information from the advertisements published in EFY.

I request you to start in EFY a column on job vacancies, especially from the advertisers who are directly or indirectly associated with you.

Lead-acid Battery Charger

Circuits for charging lead-acid batteries have been published in EFY many a times. But, I could not find one to prevent deep discharge of these batteries. Please help.

Soumen Bhattacharjee

Kolkata

EFY: You may refer to the 'Automatic Lead-Acid Battery Charger' project published in Electronics Projects Vol. 19. This circuit features fully automatic operation, reverse-polarity protection, under-voltage cut-off (deep-discharge) with alarm, over-charge protection and trickle charger.

To purchase this book, please contact EFY associate Kits'n'Spares on 011-26371661 or kits@efyindia.com

Device Datasheets

'Reading the Datasheets of Electronic Devices' article series published in EFY March, April and May issues was excellent. I request you to publish the datasheets of devices that are commonly used in equipment and the circuit of an SMPS with 6V, 9V and 12V outputs.

PC-based multimeter

I want to use my PC as a multimeter and oscilloscope. Please suggest related projects.

Farooq Masoodi

Kashmir

EFY: You may refer to the 'CompuMultimeter' project published in Electronics Projects Vol. 20 and 'PC-based Oscilloscope' in Electronics Projects Vol. 23. To purchase these books, please contact Kits'n'Spares.

USB-Powered Socket

I am assembling the 'USB-powered Socket' project published in April issue. Where can I get its PCB and component layouts, and detailed information to help me prepare this project report?

Ashish Kumar

Indore

The author T.K. Hareendran replies: Thank you for showing interest in this circuit. Any general-purpose PCB can be used for constructing the circuit. You can refer to the article 'Making Home-Brew PCBs' published in EFY April 2006.

Information given in the article is sufficient for preparing a report. Just go through the description again, to get the essence of the project. This will help you to make a report in your own style. For more information about universal serial bus, you may visit 'www.usb.org/home' website.

Project Requests

Please publish construction projects for automatic digital home UPS, weighing scales, NiMH battery chargers of various types, LED lights, and constant-current and constant-voltage power supplies, along with the contact details of the suppliers of various components used in these projects.

T.K. Bhat, Mangalore
