

LET YOUR MOBILE ENTERTAIN YOU!

Move over mobile music and gaming, there is a new timepass on the go. With the launch of 3G services, mobile TV is just around the corner!

■ UMA BANSAL

Mobile entertainment has evolved in many ways. Initially, way back in the nineties, the only form of mobile entertainment was ringtones and wallpapers. Today, music and gaming are considered as the biggest drivers of mobile entertainment. Operators are striving to deliver exciting services such as streaming audio and video, multiplayer games and mobile gambling across high-speed networks on advanced handsets.

With the launch of 3G services, the

market is only going to gain momentum. These services will revolutionise the way we entertain ourselves. Telecom operator MTNL in India has already rolled out 3G services in Mumbai. The IP-based mobile next-generation network solution, provided by Alcatel-Lucent, will equip MTNL with substantial operator benefits in network optimisation, bandwidth savings and reduced space and power requirements.

Subscription to 3G service means you can make video calls, view Live TV channels on your mobile, and download songs and data from the Internet at speeds up to 2 Mbps, amongst

many other applications involving high-speed data downloads.

3G service launch is just one of the many recent market drivers. The mobile entertainment landscape is brimming with lot many activities and offerings. Read on to explore them one by one.

Services under the umbrella

Broadly, mobile entertainment services can be divided into the following key categories: mobile music, mobile TV, mobile games, mobile gambling, mobile adult services, mobile user-generated content and mobile infotainment.
