

failure less than 10 per cent, which is due to the depreciation rate of the phosphors used and the failure chance of the electronic components involved.

Applications aplenty

Induction lamps have a range of uses, benefits and form factors. Super long life, high energy efficiency and wattages that range from 15W to 200W make these lamps a very competitive choice in many situations.

Industrial. Since factories run round the clock, quality reliable lighting is required. Induction lamps provide a better-quality light that will make workers more productive and reduce accidents.

Institutional. In schools, theatres or on sports grounds, performance is paramount. Induction lamps provide an even spread and a high colour rendition, preserving the moment for both

Since there is no filament to burn out or electrodes to fail, an induction lamp can be turned on and off without affecting the lamp life.

participants and spectators.

Commercial. Better-quality light in shopping centres and working areas creates a better experience for the people. Induction lamps have a wide spectrum of colours giving a space for advertisements.

The applications are not only limited to the above; induction lamps can be used for decorative purpose, bridge, tunnel and street lighting, hazardous areas, freezers and hard-to-reach applications, solar-powered highways, outdoor recreational

complexes, indoor shopping malls, underground pedestrian walkways, security, parking garages, signage, facade and atrium lighting, and a host of other applications.

Future is wireless

Induction lamps are finding a foothold due to the range of lighting choices, colour temperatures and increased functionality offered by them. Interest has increased towards this technology giving lighting designers a larger palette of products. Induction lamps will therefore enjoy a good market share. Development of new lamps will arrive in quicker succession and revolutionise the industry. It is believed that wireless lighting is the future of the lighting industry, offering huge cost savings as well as increased convenience. ●

Do it Yourself Electronic Kits and learn in the process

Choose from a wide range of kits to support your creative ventures. Kits 'n' Spares, a venture of EFY Group, brings to you the kits, complete with components, circuits, PCBs, hard-to-find ICs and easy-to-use instruction manuals

NEW KITS

- Chip-Talk Hobby Projects
- Cell Phone Operated Land Over
- Micro-Ultrasonic Distance Meter
- Secured Room Access System
- Microcontroller-based Bi-directional Visitor Counter
- Microcontroller Based Code Lock
- Microcontroller Based Heart Rate Meter
- Microcontroller Based Tachometer
- Automatic Low Power Emergency Light
- PC-based Automatic Time Manager
- FM Booster
- Microcontroller-Based Speedometer Cum Odometer
