Cheap Apple notebooks

Apple has updated its MacBook Pro line to include 33cm, 38cm and 43cm models. Each MacBook includes an LED-backlit display with glass multi-touch trackpad, an illuminated keyboard, an SD card or ExpressCard slot, a FireWire 800 port and NVIDIA graphics. Starting at a price of Rs 74,400, the MacBook Pro line is affordable, with some models costing up to Rs 37,000 lesser than the previous generation.

Peoples' PC

eSys Information Technologies has rolled out its latest PC, Wizard Utility, in India. Priced at Rs 9999, the product is aimed at first-time buyers, SMBs and education segments. Part of the 'People's Series,' it comes with an Intel Celeron (2.86GHz) processor and 1GB RAM. It also has a G 31 motherboard, 160GB SATA HDD and DVDWR as a standard configuration.

Pelco's surveillance products

Pelco by Schneider Electric has launched the IP range of video surveillance products in the Indian market. The Sarix HD series incorporates the latest IT standards, while adhering to open architecture principles. The Endura 2.0 is designed as an end-to-end system for the demands of professional IP video security and guarantees fault tolerance, interoperability and performance.

Online Windows desktop from Nivio

Nivio has unveiled the nivioCompanion—a tiny set-top box device. The nivioCompanion works just like a normal Windows desktop, except that it is run on the Internet instead of locally, on a computer. Like a traditional PC, Nivio is powered by Microsoft Windows. Users can access programs like iTunes, Skype, MSN Messenger, Microsoft Word, Excel and PowerPoint. The device costs Rs 4999 for standalone version. It is also available with a 38cm LCD screen, keyboard and mouse for Rs 7999.

Mobile With Gesture Gaming

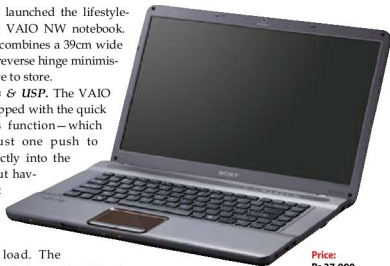

Sony Ericsson is planning to launch a cellphone called 'Yari' with gesture gaming technology. It will come preloaded with a wide selection of motion and standard games. Move your body to play the games instead of pressing buttons on the phone. Yari also features multimedia functions like high-tech music player.

NOTEBOOK WITH QUICK WEB ACCESS

THE SONY VAIO NW REQUIRES JUST ONE PUSH TO LAUNCH INTO THE WEB WITHOUT HAVING TO WAIT FOR THE WINDOWS TO LOAD

Sony has launched the lifestyle-Oriented VAIO NW notebook. The device combines a 39cm wide screen and reverse hinge minimising the space to store.

Features & USP. The VAIO NW is equipped with the quick Web-access function—which requires just one push to launch directly into the Web without having to wait for the Windows operating system to load. The notebook includes an Intel Pentium processor T4200 (2GHz), a 160GB hard disk drive and 2 GB of RAM. Wireless LAN and bluetooth provide exten-

sional. Windows Vista Home Basic (32-bit) comes pre-installed.

SPEAKER SYSTEM FOR iPods AND iPhones

BOSE SoundDock SERIES II PROVIDES DOCK-AND-PLAY SIMPLICITY

Bose has introduced the SoundDock Series II digital music system—a speaker system for iPods and iPhones that combines the same small size and high-quality audio performance as the original SoundDock.

Features & USP. The system fea-

tures a new auxiliary input that lets users connect to other audio devices, such as an MP3 player, portable CD player or music-enabled phone. It provides dock-and-play simplicity and can charge an

iPod or iPhone while in use. An included infrared remote controls the system and basic iPod and iPhone functions, including playlist navigation, from across the room. The system incorporates Bose proprietary acoustic design and signal processing for accurate sound reproduction and a spacious listening experience.
