on IPC specifications and standards for technical personnel working in PCB manufacturing and assembly. These courses have been designed in partnership with IPC, USA.

Due to the constant demand for training on IPC standards from the PCB and assembly industry, IATC has geared up its activities with two more

training courses on IPC standards of soldering and rework, modification and repair training for electronic assemblies.

Glorious to distribute T&M products also

Glorious Electronics, a 60-year-old company in the business of electronic

components and devices, has added a new division for test and measuring instruments. Thus it now provides a complete range of solutions for components and instruments under one roof.

Zakir Hussain has joined Glorious Electronics—T&M division as CEO to spearhead this initiative. He is an industry specialist with more than 20 years of experience, having worked earlier with Tektronix India as a general manager.

ST joins hands with Soitec

STMicroelectronics and Soitec, a supplier of engineered substrates, will collaborate in the development of 300mm wafer-level backside-illumination (BSI) technology for next-generation image sensors in consumer products. The agreement includes the licencing by Soitec to ST of the Smart Stacking bonding technology for the manufacturing of backside-illumination sensors on 300mm wafers. This technology, developed by Soitec's Tracit business unit, leverages molecular bonding and mechanical as well as chemical thinning. ST will develop a new generation of image sensors based on its advanced CMOS process technology at 65nm and beyond, at its 300mm facility in Crolles, France.

China Electronics Fair registers 70,000 plus visitors

The three-day 73rd China Electronics Fair (CEF) successfully closed on April 11 in Shenzhen Convention and Exhibition Center, together with International Digital Communication Exposition China 2009 (DigiCome) and 26th China International Screen Printing and Digital Technology Exhibition. Nearly 2000 high-quality suppliers witnessed this event together. The three-day exhibition received 70,324 visitors, which was the first time that it exceeded 70,000 and increased nearly 4 per cent over last year.

CEF, as a barometer of China's electronics industry, once again confirms people are paying great attention
