Intuitive Graphical Programming with NI LabVIEW

Text-Based Programming

LabVIEW Graphical Programming

National Instruments LabVIEW is designed to increase the productivity of engineers and scientists developing test, measurement, and control applications. Unlike traditional programming languages, LabVIEW graphical programming provides an intuitive, easy-to-use approach that helps users quickly acquire, analyze, and present real-world data. LabVIEW offers seamless integration with a wide range of data acquisition and instrumentation hardware, extensive built-in analysis capabilities, and comprehensive libraries for presenting data on custom user interfaces.
