

DTT-01: Digital Transistor Tester

- It is used for testing the DC parameters of manifold semiconductors such as diode, transistor, controlled silicon and field effect transistor.
- It is used to test the withstand voltage of capacitor, protection voltage of varistor and isolation of electrical.
- It able to test 78 and 79 series three-terminal voltage regulator
- The tester adopts the large scale integrated circuit for analog / digital conversion.
- It adopted liquid crystal display which can be read directly with high sensitivity and accuracy.
- It is portable and especially suitable for inspection and screening of devices and components in electronic factories as well as application of technicians engaged in electronic work, lab staff, maintainers and radio fans.
- It has compact structure and convenient operation

LCR-010P: Portable Hand Held LCR Meter

- Portable LCR meter
- Large LCD display 49 x 60mm
- Maximum count 1999
- Low Battery Warning
- Data Hold

LCR-010B: Desktop LCR Meter

- Measures low frequency components.
- Measures 6 basic parameters: L, C, R, Z, D and Q
- Basic Accuracy 0.2%
- Range Mode Auto & Hold
- Large character LCD display with back light
- Easy operation with strong functions
- SMT surface mount technique
- Fast measurement speed (80mS/meas)
- Good Readout stability

TEST-I: Multi Function PC Cable Tester

- Identify open wires , short wires, cross wires and Miss-wires connectivity
- Support 18 flat types of PC connectors
- 100 test results should be saved and transferred to PC via USB line
- Alphanumeric LCD display with back light
- Low battery indicator
- Handheld

(Dealers & Distributors Welcome. Required Experienced People for handling the sales & the services of Test & Measuring Instruments)
