

Forthcoming Short-term Certificate Courses on PCB Design, Basics of Electronics Robotics & Microcontrollers

EFY Tech Centers, at Bangalore and New Delhi, are conducting hands-on training courses that are designed to equip electronics engineering students, professionals and job seekers with practical skills.

The courses are of less than 10 days of duration, or modular in nature, making them convenient for the course participants. Limited seats are available on "first come, first served" basis.

So don't wait, enroll yourself for these courses NOW.

Who can benefit?

Electronics engineering students, hobbyists, working professionals wanting to learn more and job seekers

What do they get out of it?

Job seekers and working professionals add to their qualifications, and students and hobbyists assemble exciting engineering projects on their own

PCB Design

Duration: 5 Days (30 hours); **Schedule:** Delhi: June 8-12, Bangalore: June 29th to 3rd July **Course Fee:** Rs 4000/- **Eligibility:** Engineering students, working engineers, working diploma holders, hobbyists

COURSE DESCRIPTION:

- Learn to use EAGLE PCB design software, by gaining understanding of the basic concepts of PCB design and skills in drawing the schematic, editing and routing and creation of a library • Make a PCB layout of an electronic circuit with various components such as a microcontroller, ICs, transistors, diodes, passive components, switches and connectors

Certificate awarded by EFY

Microcontroller:

Microchip PIC16F877A (Delhi & Bangalore)

Duration: 10 days (60 hours); **Schedule:** Delhi & Bangalore: 8-17 June Delhi: 10-20 Aug **Course Fee:** Rs 6000/- **Eligibility:** Engineering students, working engineers, working diploma holders

COURSE DESCRIPTION: • Understand the architecture of PIC16F877A microcontroller • Understand the memory organisation, special-function registers and on-chip peripherals • Learn instruction set and writing of codes in Assembly language • Learn the simulation, real-time debugging and programming processes with the help of MPLAB ICD 2 and PIC Development board • Learn integration of common peripherals with microcontroller through hands-on lab exercises

Certificate awarded by Microchip Inc., USA

Accommodation can be arranged in a private hostel/guest house on prior request.

Payments should be sent to:

Ms Jayashree, **EFY TECH CENTER**
No. 9, 17 Main First Cross, HAL Second Stage, Indira Nagar,
Bangalore E-mail: efybir@efyindia.com, Phone: 080-25260394

Basics of Electronics (New Delhi)

Duration: 5 days (30 hours); **Schedule:** Delhi: June 25-30, Bangalore: June 22-26 **Course Fee:** Rs 4000/- **Eligibility:** Engineering students, diploma holders, 12th pass with physics, hobbyists

COURSE DESCRIPTION:

- Know about electronic components (both active as well as passive)
- Learn important circuit blocks which will help you in developing your own minor project • Familiarise with basic test equipment for testing and fault-finding • Learn soldering through assembly of an EFY kit

Certificate awarded by EFY

Embedded Systems

On popular demand, training on embedded systems is now scheduled to start around the middle of June this year. Planned to be eight weeks long, it will be divided into four modules of two weeks each. The modules are likely to cover An Overview of Embedded Systems, PIC and Atmel microcontrollers, Programming in C and Embedded C, RTOS, Special Networking Protocols and much more. Venue (Bangalore/Delhi) and exact dates will be announced soon.

Certificate awarded by EFY

Mode of payment: Please add 10.3% Service Tax while paying fee. The fee may be paid in cash or through a DD in the name of **EFY Enterprises Pvt Ltd**, payable at Delhi or Bangalore. **You can pay the entire fee at one go or register by paying Rs 1000 as advance towards the course fee.**
