BlackBerry solution by MTNL

MTNL has launched BlackBerry enterprise server and BlackBerry Internet service along with a host of smartphons including the BlackBerry Bold, BlackBerry Curve 8310 and BlackBerry 8700 g, in Mumbai. The BlackBerry solution brings together smartphones, software and services to provide customers with wireless access to e-mail, phone, calendar, IM, Internet, intranet and multimedia applications as well as other mobile business and lifestyle applications.

Nikon with LCD monitor

Nikon has entered the consumer digital SLR/DV video category by unveiling the Nikon D5000. It is the world's first DSLR camera with a 450-degree rotating LCD screen. The D5000 can be purchased for Rs 48,950 and Rs 55,950.

Airtel comes out with Net PCs

Bharti Airtel has launched a low-cost online computer exclusively for its broadband customers in Delhi, Gurgaon and Noida. Available for Rs 7999, the Airtel Net PC is a ready-to-use computer—inclusive of a 38.1cm LCD monitor, keyboard, mouse and Nivio companion. Powered by Nivio and Microsoft, the PC provides an operating system with a Windows-based online desktop, 10GB space and 100 per cent data security.

Limited-period offer on BenQ netbooks

BenQ has launched a limited period offer on its netbook models Joybook Lite U101 and U101C. The offer entitles every customer to a free BenQ external portable DVD writer with every purchase of a Joybook Lite. Through this combo offer, BenQ aims to target first-time PC buyers who are looking for a complete entertainment package at an affordable cost. Joybook Lite U101 and U101C are available through all BenQ dealers for Rs 22,990 and Rs 20,990, respectively.

LG to develop energy-efficient CTVs

LG Electronics India has introduced star-rated CTVs in India. These CTVs will comply with the guidelines issued by the Bureau of Energy Efficiency (BEE) for annual power consumption. LG 5 star-rated televisions will have an annual power consumption (maximum) of 147 kWh in 53.3cm flat models and 200 kWh in 73.7cm flat models, considering a daily usage pattern of six hours in 'on' mode and 12 hours in 'standby' mode.

LCD-BASED PROJECTOR

THE PROJECTOR'S ECO MODE REDUCES NOISE

Price:
NP600S-Rs 110,000
NP500WS-Rs 85,000 (plus taxes)

NEC has introduced two new LCD-based multifunction projectors—the NP600S and NP500WS.

Features & USP. The projectors feature a WXGA panel for wide-format images, wide array of input/output terminals and wall colour correction for vivid images, projected directly onto uneven surfaces such as walls. These also come with 'eco mode', which enables users to reduce projec-

tor noise while extending the life of the lamp, translating into low cost of ownership. Their panel-crashed air-cooling technology decreases heat outage up to 20 per cent by optical components, leading to less rotations of the cooling fan and thus less power consumption and noise emission. The rainbow effects that arise during technicolour video presentations have been removed in these devices.

NP500WS is rated at 3000 lumens, meaning that it is capable of operating with indoor lighting without any major problem. It accepts a number of 'standard' inputs such as components, S-Video, VGA and DVI. NP500WS also allows remote control of the projector via LAN or through the VGA port. Vertical inclination and trapezoidal distortions are automatically corrected.

'COOL' LAPTOP

HCL LEAPTOP Z39 WITH ADVANCED THERMAL ENGINEERING TO KEEP IT COOL

HCL Infosystems has launched the HLeaptop Z39—the first-of-its-kind power-packed laptop with 8GB RAM and 500GB HDD.

Features & USP. The Leaptop Z39 is based on the latest Intel Centrino 2 technology and is designed for Indian conditions, with advanced thermal engineering (ATE) technology. In India, the ambient temperature is higher than in Europe. Hence the surface of a laptop tends to heat up faster, making it extremely uncomfortable for users. HCL's ATE technology ensures that at any point of time, the surface temperature on the keyboard and the left and right palm is not more than 6°C

**Price: Rs 59,990**

than the ambient temperature, thereby ensuring comfort. The device has a battery backup of about four hours. Z39 consumes less than 1.7W of energy in sleep mode and below 1W in standby mode, and is optimised to reduce its power consumption. It is available nationwide at all HCL DigiLife stores, premium large-format retail and other HCL retail outlets.
