| <b>Dimensions and weight</b>   | : 260 (W) x 185 (D) x 33.4 (H) mm, 1.33 kg                                                                                                                                                                                                                                                                |                                                                                   |
| <b>I/O ports</b>               | : Multi-in-1 card reader, three USB 2.0 ports, external display (VGA) port,<br>headphone/speaker/line-out jack, microphone-in jack, Ethernet (RJ-45)<br>port, DC-in jack for AC adaptor                                                                                                                   |                                                                                   |

But some similarities also exist, such as portability and power saving modes.

## How much do the netbooks cost?

Netbooks are generally available in the price range of Rs 18,000 to Rs 35,000. In the economy price band, you'll find Acer, ASUS and HCL netbooks costing below Rs 20,000. In the value band, Dell and HP have netbooks priced between Rs 20,000 and Rs 25,000.

## Who should go for a netbook?

Netbooks are likely to attract a variety of users with different usage scenarios: content consumption, Internet browsing, e-mail, instant messaging, keeping in touch with friends and family, storing and sharing pictures, document management and so on. Potential users are likely to include both first-time buyers seeking a low-cost introductory

PC as well as experienced users seeking a low-cost second or third PC for themselves or a relative.

Netbooks may not be a good

proposition for people who work on CPU-intensive applications such as PhotoShop and computer-aided design. The absence of an optical drive might be a deterrent for some folks. But then, there are external USB-based optical drives which make the task simple.

In India, netbooks are the best option for basic computer education and for small business and home uses. These can perform very well for e-mailing, MS Word, MS Excel, MS PowerPoint and many others basic uses.

They're half the weight of a regular notebook PC and considerably smaller. These are big advantages for business travelers or students who must lug a notebook on a daily basis.

So netbooks are perfect companions for professionals, bloggers, students and businessmen—specifically the people who travel a lot.

## What configuration is available?

**Screen size.** Usually, the screen size of netbooks ranges from 17.8 cm (7 inches) to 25.9 cm (10.2 inches) and more recently 29.5 cm (11.6 inches)

**Display resolution.** Resolutions tend to range from 1024x600 to 1280x768

**Keyboard.** Though most netbook keyboards save space by consolidating
