

RATINGS AND CHARACTERISTIC CURVES 1N4001 THRU 1N4007

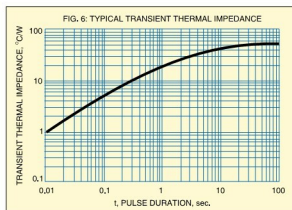

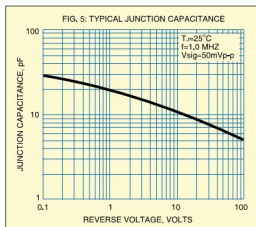

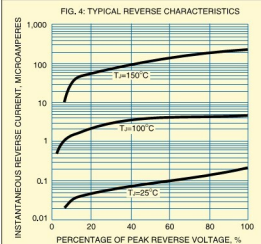

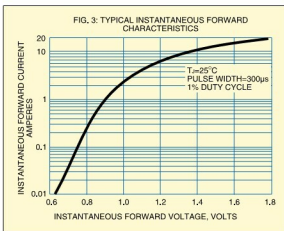

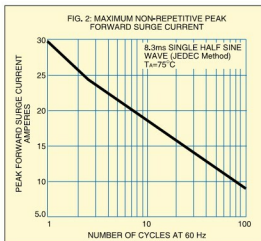

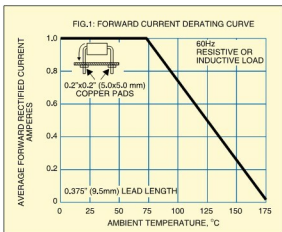

Fig. 5: Performance curves of diodes 1N4001 to 1N4007

Performance curves. Performance curves of interest as a function of voltage, current, temperature, etc follow next. These include the

characteristics of the device, such as drain current versus drain voltage (drain characteristics) or drain current versus gate voltage (transfer

characteristics) in the case of FETs, emitter voltage versus emitter current in the case of UJTs and forward voltage versus forward current in the
