STORAGE

Stylish hard drive

Transcend Information, Inc. has announced a 6.4cm (2.5-inch) portable hard drive. The elegant and sleek StoreJet 25F measures only 113.8×80.9×15.9 mm³. It is designed for business travel-

ers and people who prefer an elegant way to carry their data. Despite its compact size, the StoreJet 25F has up to 500 GB of storage space, so you can easily transfer, store and share important files and data.

Enterprise-class hard drives

Seagate has announced two new members of its Cheetah enterprise-class hard drive family: the 15K.7 and the NS.2. For businesses that have an existing investment based on a standard 8.9cm (3.5-inch) enterprise infrastructure, the new Cheetah drives bolster sustainability through easy drive/system integration, and provide improved

levels of system performance, capacity, reliability and lower power consumption.

Built for 8.9cm Tier 1 storage applications, the 15K.7 and the NS.2 are said to be the largest-capacity, mission-critical drives offered at 600 GB. The 15K.7 is claimed to deliver the highest performance of any 8.9cm drive, while the NS.2 features the lowest power requirement of any 8.9cm Tier 1 drive.

TEST & MEASUREMENT

Reference thermometers

Hart Scientific, a division of Fluke Corporation, has introduced the Fluke 1523 and Fluke 1524 handheld reference thermometers for platinum resistance

thermometer (PRT), thermocouple and thermistor temperature measurement. The single- and dual-channel models feature precision components and circuitry

to put lab-quality measurement in easy reach of field technicians and engineers.

These rugged and affordable thermometers offer accuracy of $\pm 0.002^{\circ}\text{C}$ —a level appropriate for high-precision field work in oil, gas and other industries, where the current practice is the use of toxic mercury-in-glass thermometers. Fluke guarantees the specifications in -10°C to 60°C

ambient temperatures, with the best performance over the range of 13°C to 33°C .

Handheld digital multimeters

Messals Overseas (India) has introduced high-performance, handheld digital multimeters (model Nos 1061 and 1062) from Kyoritsu, Japan.

These 50,000-count, true-RMS multimeters have basic DC accuracy of 0.025 per cent. They use high-performance, UL-standard fuses with user calibration function. Peak-hold response time is 250 μs . The multimeters can measure AC/DC voltage up to 1000V, current up to 10A and resistance up to 50 mega-ohms. Other functions include temperature and capacitance measurements with diode test and continuity check.

TOOLS & EQUIPMENT

Energy saver

The Coolite energy saver by Conzerv helps to save 10 to 20 per cent of direct lighting energy consumption and runs lamps cooler. It looks similar to a computer's CPU and has to

be connected to the lighting supply. Coolite is suitable for stabilised lighting circuits in commercial buildings and complexes, hotels, hospitals, BPOs, cinema halls, auditoria, stadia
