Inductive proximity sensor

R.S. Electronics has introduced inductive proximity sensors that can detect the presence of a wide range of metallic targets. This detection is accomplished without contacting the target and is mechanically wear-free.

The sensors are available in DC as well as AC, in various sizes ranging from M8 to M80, with various

configurations and sensing distances. Inductive micro box sensors, slot sensors or any other type of sensor can be supplied as per the specific requirement.

Foot switch

Teknic's foot switch (type FS-99) is ideal for any light- to medium-duty application, with an electrical rating of 16A, 1/2HP, 250V AC. It can serve as a foot-operated, 'on'/'off' switch for a wide range of motor-driven and electrical

devices. The switch is constructed with a sturdy metal housing and can be used as an independent product, but can also be supplied with an additional guard in different colours for certain applications.

The switch can be used in

operation of logic signals, coil-winding machines, photo lab equipment, sewing machines, packaging equipment, conveyor belts, printing equipment and CNC machines.

Air-dust cleaner

Cecon Pollutech Systems has introduced a high-efficiency, portable, air-dust cleaner designed to create dust-free atmosphere in conditioned and non-conditioned areas. Cleaning efficiency of this system is 0.1 micron with power consumption of 150 watts.

The wall-hanging cleaner is easy to install with low maintenance cost and nil consumables required for operation. It is highly useful for places like currency chest and sorting areas in process control rooms of banks, telephone exchanges, research laboratories, operation theatres, and other places requiring clean and dust-free atmosphere.

NETWORKING

Broadband router

Edimax's Ultra Range plus Wireless-N broadband router is a 3-in-1 device. First, there's the wireless access point,

which lets you connect to the network without wires. There's also a built-in 4-port, full-duplex 10/100 switch to connect your wired-Ethernet devices together.

Finally, the router function ties it all together and lets your whole network share a high-speed cable or DSL Internet connection.

COMPONENTS

IGBT for xenon flash

Sanyo Semiconductor claims to have developed the industry's smallest IGBT for xenon flash to be used in portable camera phones and compact

digital cameras.

The new IGBT reduces its mounting area by 60 per cent compared to Sanyo's current products while keeping the equivalent performance required for light control of the xenon flash. This new product is ideal for portable camera cell phones as well as compact digital cameras.

The IGBT contributes to environmental friendliness by incorporating lead-free external terminals, halogen-free packaging and reduction of rare metals used. Smaller, thinner, and high-performance package leads to resource savings and energy efficiency.

Broadband signal amplifier IC

STMicroelectronics has introduced a broadband signal amplifier IC that supports higher frequencies and faster response, as well as lower noise, than amplifiers used in current equipment.

The TS617 supports up to 200MHz operation, which will satisfy faster broadband services such as 24Mbps ADSL2+, and VDSL offering up to 100Mbps download and upload speeds. It is also optimised for use in broadband powerline networking
