SDHC video cards

Kingston Technology Company, Inc., has released a line of SDHC video cards for use in digital camcorders. The SDHC video cards carry plenty of recording time and are available in 60-minute (4GB), 120-minute (8GB) and 240-minute (16GB) capacities.

The cards feature a Class-4 speed rating, which guarantees a minimum data transfer rate of 4 MB/s, making them ideal for use in the latest digital

camcorders and for fast transfer from the card to a PC.

Video encoder

Axis Communications has introduced a highly compact and cost-effective one-channel video encoder with H.264 video compression.

The M7001 video encoder is perfect for integrating small or large numbers of analogue CCTV surveillance cameras into an IP-based video surveillance system. Installed close to an analogue camera, it converts analogue video signals from the analogue camera into digital video streams that are then sent

over an IP-based network (LAN/intranet/Internet). The video encoder also provides pan, tilt and zoom support to PTZ and PTZ dome cameras.

AXIS M7001 can deliver two simultaneous video streams, one in H.264 and another in Motion JPEG, at full frame rate in all resolutions up to D1 (720x480 in NTSC, 720x576 in PAL). It drastically reduces bandwidth and storage requirements without compromising image quality.

Test V-I Signatures in a jiffy

QNimits

QT15 V-I Signature Tester

Key Features :

- Unique Trouble-shooting Tool
- Nodal Impedance Test
- Save & Compare Facility
- Data Transfer to PC through USB Port (Optional)
- In-built Color LCD TFT Screen
- Truly Portable Unit

Ideal for :

- Electronics Repair Shops
- Field Engineers & Technicians
- In-house or Third Party Service Centres
- Recovery of Failed Boards in Manufacturing Process

FREE EX430

Economical True RMS multimeter with 11 functions from EXTECH, USA

(Only for QNimits orders booked before 31st Mar. '09)

Dealership / Stockist enquiries are welcome.
