Semiconductor market continues to grow

The total revenues of the Indian semiconductor market are poised to grow from \$5.9 billion in 2008 to \$7.59 billion in 2010 at a CAGR of 13.4 per cent. The total available market revenues are anticipated to climb from \$2.53 billion in 2008 to \$3.24 billion in 2010 with a CAGR of 13.1 per cent, according to a report by The India Semiconductor Association (ISA) and Frost and Sullivan (F&S).

IT and office automation, wireless handsets and communication segments are going to define the semiconductor market growth. The semiconductor market growth is expected to be driven by such products and services as set-top boxes, wireless handsets, the 3G rollout, deployment of WiMAX, notebooks and smart cards. Opportunities exist for semiconductors in LCD TV, digital camera and storage Flash memory markets.

Telecom too shows growth

Defying the economic slowdown, the telecom sector has witnessed a robust growth. The companies are adding substantial number of subscribers and this trend is persisting for the last many quarters. For instance, the aggregate net subscriber addition during the quarter ended December 2008 was around 31.6 million resulting in a sequential growth of 10 per cent.

Indian telecom services providers are at different phases of their growth cycles and have adopted different business models to attract new customers. Bharti Airtel, which is the market leader with around 25 per cent market share, is in a stable growth phase, thanks to its pan-India GSM service.

The other two big players—Reliance Communications (RCOM) and Idea—are launching their GSM serv-

Satoru Ito to retire as Renesas chairman, CEO
